Thirty-Second Annual Report

—OF THE—

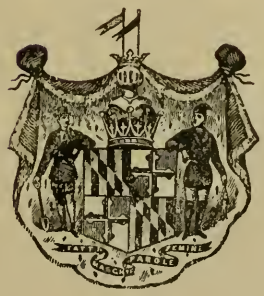
State Board of Education,

—SHOWING THE CONDITION OF THE—

Public Schools of Maryland,

—FOR THE—

YEAR ENDING JULY 31, 1898.



BALTIMORE:
PRESS OF KING BROTHERS,
1899.

STATE OF MARYLAND.

OFFICE OF THE STATE BOARD OF EDUCATION,

BALTIMORE.

TO HIS EXCELLENCY LLOYD LOWNDES,

Governor of Maryland:

SIR—I have the honor to transmit to you the Annual Report of the State Board of Education for the fiscal and school year ending July 31, 1898, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

E. B. PRETTYMAN,

Secretary.

76599

REPORT

—OF THE—

STATE BOARD OF EDUCATION.

The following summary, in connection with the accompanying tables, exhibits, in a condensed form, the most important facts connected with the administration of the public school system of the State, for the fiscal and school year ending in the city of Baltimore, December 31, 1897, and in the counties, July 31, 1898.

The several items are compared with the corresponding items for 1896 in the city of Baltimore, and for 1897 in the counties:

Number of schools in Baltimore city	192	
" " the counties	2,273	
Total		2,465
Being an increase in 1898 of 11		
Number of different pupils, city	94,708	
" " " counties	141,295	
Total		236,003
Being an increase in 1898 of 6,056		
Highest number enrolled in one term, city	67,192	
" " " " " counties	134,924	
Total		202,116
Being an increase in 1898 of 12,220		
Average number in daily attendance, city	54,274	
" " " counties	80,265	
Total		134,539
Being an increase in 1898 of 912		

Number of teachers, city		1,866	
" " counties		3,121	
Total			4,987
Being an increase in 1898 of	151		
Number of months schools were open, city		10	
" " " " counties		8.6	
Average for the State			9·3
Being an increase in 1898 of	.2 of a month		
Receipts from all sources, city	$1,484,518 55		
" " " counties	1,551,088 31		
Total			$3,035,606 86
Being an increase in 1898 of	$456,960 36		
Amount paid for teachers' salaries, city		$1,092,762 06	
" " " " counties		874,195 34	
Total			1,966,957 40
Being an increase in 1898 of	$93,785 75		
Amount paid for building, repairing and furnishing school houses, city		$212,672 79	
Amount paid for building, repairing and furnishing school houses, counties		103,178 47	
Total			$315,851 26
Being a decrease in 1898 of	$11,047 34		
Amount paid for books and stationery, city		$72,711 47	
" " " " counties		68,514 92	
Total			$141,226 39
Being an increase in 1898 of	$9,807 73		
Amount paid for rent, fuel and other incidentals, city		$98,708 47	
Amount paid for rent, fuel and other incidentals, counties		81,357 93	
Total			$180,066 39
Being an increase in 1898 of	$14,638 48		
Total expenses for public school purposes, city	$1,501,238 55		
" " " " " counties	1,551,088 31		
Total			$3,052,326 86
Being an increase in 1898 of	$349,402 81		

Excluding the city of Baltimore, the county schools show the following results:

Number of schools	2,272	
Increase in 1898		7
Total number of scholars enrolled	141,295	
Increase in 1898		2,344
Highest number enrolled in one term	134,926	
Increase in 1898		10,815
Average number enrolled	115,071	
Increase in 1898		690
Average number in daily attendance	80,265	
Decrease in 1898		136
Number in first grade	34,854	
Decrease in 1898		693
Number in second grade	19,754	
Decrease in 1898		1,278
Number in third grade	21,864	
Decrease in 1898		315
Number in fourth grade	20,263	
Decrease in 1898		323
Number in fifth grade	15,226	
Decrease in 1898		467
Number in sixth grade	9,670	
Increase in 1898		744
Number above sixth grade	5,862	
Increase in 1898		883
Number studying book-keeping	2,477	
Decrease in 1898		159
Number studying algebra	7,948	
Increase in 1898		1,009
Number studying philosophy	4,032	
Increase in 1898		73
Number studying drawing	27,255	
Decrease in 1898		2,131
Number studying geometry	3,580	
Decrease in 1898		381
Number studying physiology	25,518	
Increase in 1898		2,931
Number studying latin	2,196	
Increase in 1898		208

Number of teachers, (including assistants)—Men—white, 940; colored, 213; total	1,153	
Women—white, 2,181; colored, 352; total	2,533	
Total	3,686	
Increase in 1898		648
Average number of months schools were open		8.6
Amount received from State school tax, (white schools), free school fund and academic donations	$483,941 68	
Increase in 1898		$188,354 44
Amount received from State school tax appropriated to colored schools	$97,884 17	
Increase in 1898		$ 21,919 79
Amount received from county tax	$ 646,892 95	
Increase in 1898		$ 50,076 04
Amount paid for teachers' salaries	$874,195 34	
Increase in 1898		$12,473 33
Amount paid for building, repairing and furnishing school houses	$ 103,178 47	
Decrease in 1898		$ 4,393 01
Amount paid for books and stationery	$68,514 92	
Increase in 1898		$ 1,411 53
Amount paid for supervision and office expenses	$43,937 23	
Increase in 1898		$1,317 42
Amount paid for incidental expenses, including rent and fuel	$81,357 93	
Increase in 1898		$7,626 25
Amount paid for interest	$8,866 64	
Increase in 1898		$809 38
Amount paid for miscellaneous expenses	$27,814 78	
Decrease in 1898		$607 45
Amount of indebtedness paid	$211,837 58	
Increase in 1898		$146,228 88
Total expenses for public school purposes in the counties	$1,551,088 31	
Increase in 1898		$252,707 82

The items which show an increase are:

Teachers' salaries	$12,473 33	
Books and stationery	1,411 53	
Incidental expenses, rent and fuel	7,696 25	
Interest	809 38	
Indebtedness paid	146,228 88	
Supervision and office expenses	1,317 42	
Total		$169,936 79

The items which show a decrease are:

Building, repairs and furnishing	$4,393 01	
Miscellaneous	1,607 45	
Total		$6,000 46

Showing a net increase of expenditures in 1898..... $163,936 33

STATE TABLES.

STATE TABLES.

The State tables annexed present the usual summary of interesting facts.

Table "A" shows the population of Maryland by counties and the number of white and colored, according to the census of 1890.

Table "B" shows the population between five and twenty, and the quarterly distribution of the State school tax to the white schools of the several counties and the city of Baltimore.

Table "C" shows the colored population between five and twenty, and the quarterly distribution of the State school tax to colored schools of the several counties and the city of Baltimore.

Table "D" shows the assessed value of the property subject to taxation in the several counties, with the amounts, as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools," and "County School Tax."

Table "E" shows receipts from all sources, with the totals, (including balances carried over.)

Table "F" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairing and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and the totals.

Table "G" shows the number of pupils in the primary grades, and the number studying special branches.

Table "H" shows the number of schools in each county, the number of months schools were open, the number of teachers, male and female, the number of different pupils, the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "I" shows the cost of the colored schools and the statistics (under the same heads as those mentioned in Table "H") of the colored schools separately.

Table "K" shows the receipts from all sources for colored schools (including balance carried over.)

Table "L" shows the expenditures for colored schools under the heads mentioned in Table "F."

Table "M" gives the statistics of the several colleges receiving State donations, and of the State Normal School.

Table "N" gives the statistics of the several schools and academies receiving State donations.

The county reports give in detail the enrollment and the average attendance for each term, and the expenses of each individual school, under the heads of rent, fuel, repairs, incidentals, furniture, blackboards and stoves, books, and teachers' salaries. Every citizen can thus know what the school in his district has cost, and may become the auditor of the accounts. It is believed that no State in the Union furnishes a similarly minute detail of expenses.

REPORT

—OF THE—

SECRETARY.

REPORT OF THE SECRETARY.

The summary included in the report of the State Board of Education, and the State tables immediately following, give a comprehensive view of the condition of the public schools during the last school year, ending July 31, 1898. The statistical reports of the Board of Commissioners of Public Schools of Baltimore City, and of the School Commissioners of the several counties of the State, present, in minute detail, the facts concerning the schools, and show the receipts and disbursements for their support.

A copy of the usual circular requesting supplementary reports, dated November 23, 1898, was mailed to each County Examiner in the State.

The following are the supplementary reports that have been received to January 1, 1899:

FREDERICK COUNTY.—*Ephraim L. Boblitz, Examiner.*

The total enrollment of pupils in Frederick county for the year closing July 31, 1896, was 10,374; for the year closing July 31, 1897, 10,933, and for the year closing July 31, 1898, 10,990. The system of free books is working very satisfactorily in our county, removing causes of friction between teachers and patrons, and stimulating increased and more regular attendance of pupils. Pupils in all grades are now supplied with books free of cost.

Twenty-eight schools are now supplied with libraries of from twenty-five to four hundred volumes, consisting of books of reference, biography, history and fiction. The influence of these libraries is apparent in every school where the pupils possess this advantage, as shown in the greater general knowledge of the pupils and in the judgment displayed in their work in the schoolroom. The library is the teachers greatest and best assistant.

Our county has no Teachers' Library. The establishment of such a library, under judicious management in the selection of books of reference, history and biography, would

doubtless have a beneficial effect in increasing the general knowledge of the teacher and giving him a wider and more comprehensive grasp of the problem of education.

The County Teachers' Institute, held in City Opera House, December 20–23, was attended by nearly all teachers in the county, the only absentees being those who gave very satisfactory explanations for their absence.

HOWARD COUNTY.—*Philip T. Harmon, Examiner.*

Dear Sir:—In reply to your letter of 23d ult., I would respectfully state that I can add but little to the information conveyed in the report to the State Board of Education. In regard to increased attendance, the statistics show that while the whole number of pupils enrolled is less than for last year, the average attendance is about 4½ per cent. higher, showing an increase of interest and giving the teachers an opportunity for better results. School officers and teachers attribute this better attendance to free books.

Howard county, I am sorry to say, lacks a County Teachers' Library, one of which should be in each county, not only for the mere educational advantages they afford, but they would broaden the social and intellectual intercourse of teachers and tend to decrease the proneness to fall into a routine, or what is generally known as a "rut."

About one-sixth of the schools have circulating libraries, the number being nearly doubled in the last two years. I regret that I cannot give, even approximately, the number of volumes.

WASHINGTON COUNTY.—*George C. Pearson, Examiner.*

The schools of Washington county opened with a larger enrollment than in former years. The schools of Hagerstown show an increase of pupils, and it was necessary to open three new schools, which will be followed with the opening of a fourth in the near future.

Seven new buildings have been erected during the past summer and autumn. These buildings have been erected on improved plans, and all of them have been covered with slate. The specifications have been revised so as to add strength and

comfort. In buildings of one room an experiment has been made in heating the room with jacketed stoves placed in the cellar. It is too early in the season to report if this mode of heating will be a success.

Free Text Books have not been given to all grades as the money has not been sufficient to do so. The total number of different pupils for 1895, 1896, 1897 and 1898 are given, and from these a conclusion can be drawn—1895, 8,652; 1896, 8,930; 1897, 9,023; 1898, 9,197.

The reports show the following to be the average attendance of pupils—1895, 6,163; 1896, 5,658; 1897, 6,495; 1898, 6,610.

There are about 1,900 volumes in the school libraries of the county, and additions are made from time to time, so that some of the schools will be fairly equipped with books, especially will this be true where due care has been taken in the selection of books. It would be a great help if a list of books could be suggested from which the selections for additions to the library could be made.

Vaile's Vertical System of Writing has been adopted and introduced into all grades. This has proved to be a success, wherever it has been taught with fidelity and care.. A larger number of the pupils can write legibly, and the teachers report to me that they can teach a child to write with fewer hindrances than they could when they used the slant.

The Pollard System has been used for some time in a few of the Primary Schools, and this year the study of this system has been introduced into the Female High Schools. This will prepare persons for the work, which requires a most capable teacher. Where the Pollard System has been used in the county, good results have followed.

The Shaftesbury training taken by some of the teachers has in every intsance improved the reading in the departments of those receiving this training.

ARBOR AND HIGHWAY DAY.

Arbor and Highway Day was observed by all the public schools of the State on the 15th day of April, 1898, in pursuance of the following proclamation by His Excellency, the Governor:

EXECUTIVE DEPARTMENT,
ANNAPOLIS, MARYLAND.

PROCLAMATION.

To the People of Maryland:

WHEREAS, by joint resolution No. 15 of the General Assembly of Maryland, adopted in 1894, the Governor is authorized to issue a Proclamation annually, designating a day in April for the planting of Forest Trees, to be known as "Arbor and Highway Day;"

Now, therefore, I, LLOYD LOWNDES, Governor of the State of Maryland, do hereby designate Friday, the fifteenth day of April, 1898, as Arbor and Highway Day, and I do recommend that the day be devoted by the people of this State to the planting of Forest Trees; and I especially recommend to parents and teachers in the public schools that they encourage their children or those under their influence to plant or transplant at least one Forest Shade Tree on that day, by the side of a public road, or about their school house.

It is hoped by the observance of this custom to counteract the evil effects resulting from the rapid destruction of Forests in our State, and to maintain a due proportion of Forest Land, which is essential to the comfort, health and convenience of every country.

THE GREAT SEAL. OF MARYLAND.

Given under my hand and the Great Seal of Maryland. Done at the City of Annapolis, on the eighteenth day of March, in the year of our Lord, eighteen hundred and ninety-eight.

LLOYD LOWNDES, *Governor.*

By the Governor:

RICHARD DALLAM, *Secretary of State.*

The following was the Arbor and Highway Day program at the Maryland State Normal School:

"And what is so rare as a day in June?
Then Heaven tries the earth if it be in tune
And over it softly her warm ear lays.
Whether we look, or whether we listen,
We hear life murmur, or see it glisten;
Every clod feels a stir of might,
An instinct within it that reaches and towers,
And, grasping blindly above it for light,
Climbs to a soul in grass and flowers."

—*James Russell Lowell.*

PROGRAM.

HYMN—"Summer Days Once More Are Coming," - - - *Bellini.*

SELECTIONS FROM THE BIBLE REGARDING TREES.

Responsive Reading.

GEN. 1: 11, 12. And God said, let the earth bring forth grass, the herb yielding seed, and the fruit tree yielding fruit after his kind, whose seed is in itself: and it was so.

And the earth brought forth grass, and herb yielding seed after his kind, and the tree yielding fruit, whose seed was in itself, after his kind; and God saw that it was good.

LEVIT. 23: 39, 40. When ye have gathered in the fruit of the land, ye shall keep a feast unto the Lord seven days; on the first day shall be a sabbath, and on the eighth day shall be a sabbath.

And ye shall take you on the first day the boughs of goodly trees, branches of palm trees, and the boughs of thick trees, and willows of the brook; and ye shall rejoice before the Lord your God seven days.

DEUT. 20: 19. When thou shalt besiege a city a long time, in making war against it to take it, thou shalt not destroy the trees thereof by forcing an axe against them, for thou mayest eat of them, and thou shalt not cut them down; (for the tree of the field is man's life) to employ them in the siege.

1 KINGS, 4: 29, 33. And God gave Solomon wisdom and understanding exceeding much.

And he spake of trees, from the cedar tree that is in Lebanon, even unto the hysop that springeth out of the wall.

1 KINGS, 9: 10, 11. And it came to pass at the end of twenty years when Solomon had built the two houses, the house of the Lord and the king's house, (now Hiram the king of Tyre had furnished Solomon with cedar trees and fir trees, and with gold according to all his desire,) that then king Solomon gave Hiram twenty cities in the land of Gallilee.

1 KINGS, 10: 11, 12. And the navy also of Hiram that brought Gold from Ophir, brought in from Ophir great plenty of almug trees, and precious stones.

And the king made of the almug trees pillars for the house of the Lord, and for the king's house, harps also, and psalteries for singers.

JOB 14: 7, 8, 9. There is hope of a tree if it be cut down, that it will sprout again, and that the tender branch thereof will not cease.

Though the root thereof wax old in the earth, and the stock thereof die in the ground; yet through the scent of water it will bud, and bring forth boughs like a plant.

PS. 96: 12. Let the field be joyful, and all that is therein; then shall all the trees of the wood rejoice before the Lord.

PS. 104: 16, 17. The trees of the Lord are full of sap; the cedars of Lebanon, which he hath planted; where the birds make their nest; as for the stork, the fir trees are her house.

ECCLE. 2: 5, 6. I made me gardens and orchards, and I planted trees in them of all kinds of fruits.

I made me pools of water, to water therewith the wood that bringeth forth trees.

Is. 55: 12, 13. For ye shall go out with joy, and be led forth with peace: the mountains and the hills shall break forth before you into singing, and all the trees of the field shall clap their hands.

Instead of the thorn shall come up the fir tree, and instead of the brier shall come up the myrtle tree.

Prov. 3: 13, 18. Happy is the man that findeth wisdom, and the man that getteth understanding. She is a tree of life to them that lay hold upon her.

Prov. 15: 4. A wholesome tongue is a tree of life.

Matt. 7: 16-20. Do men gather grapes of thorns, or figs of thistles?

Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit. A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit.

Every tree that bringeth not forth good fruit is hewn down and cast into the fire. Wherefore by their fruits ye shall know them.

John 15: 5, 8. I am the vine, ye are the branches: He that abideth in me and I in him, the same bringeth forth much fruit: for without me, ye can do nothing.

Herein is my Father glorified, that ye bear much fruit; so shall ye be my disciples.

Matt. 6; 25, 29. Is not the life more than meat, and the body than raiment? Behold the fowls of the air: for they sow not, neither do they reap, nor gather into barns; yet your heavenly Father feedeth them.

Consider the lilies of the fields, how they grow, they toil not, neither do they spin: And yet I say unto you, that even Solomon in all his glory was not arrayed like one of these.

Luke 12: 28. If then God so clothe the grass, which is to-day in the field, and to-morrow is cast into the oven, how much more will he clothe you, O ye of little faith.

Rev. 2: 7. To him that overcometh will I give to eat of the tree of life, which is in the midst of the paradise of God.

Rev. 22: 14. Blessed are they that do his commandments, that they may have right to the tree of life, and may enter in through the gates into the city.

ASSOCIATIONS.

THE MARYLAND STATE TEACHERS' ASSOCIATION did not hold its annual session, as a separate organization, in 1898.

The National Educational Association had arranged to hold its annual session in the city of Washington, D. C., July to . As Washington is so easily accessible from every part of the State of Maryland, the Executive Committee of the State Association, after careful deliberation and consultation, concluded that it would be better to recommend that our teachers and school officers attend the N. E. A.

A large number of the friends of public education of the State, accordingly, attended the sessions of the National

Educational Association. Headquarters were opened by our Executive Committee at the Ebbitt House, and decorated with the Maryland Colors and with some portraits of eminent Marylanders. The sessions were delightful, and no doubt our people were greatly benefited.

The officers of the Maryland State Teachers' Association, chosen at the Blue Mountain House, in 1897, will necessarily hold over, and will arrange for its meeting in 1899.

These officers are as follows:

President.—Prof. John T. White, of Cumberland, Md.

Vice-Presidents.—Prof. Charles F. Raddatz, of Baltimore, and Thomas W. Jones, of Caroline county.

Recording Secretary.—A. F. Wilkerson, of Baltimore.

Corresponding Secretary.—Miss Agnes F. Matlack, of Rockville.

Treasurer.—Prof. Alexander Chaplain, of Easton.

Executive Committee.—John D. Worthington, of Belair; Charles B. Rogers, of Towson; Louis L. Beatty, of Centreville, and Prof. William E. Smith, of Annapolis.

ASSOCIATION OF SCHOOL COMMISSIONERS AND EXAMINERS OF MARYLAND.

The Association of School Commissioners and Examiners of Maryland held its annual session at the State Normal School Building, in Baltimore, December 1 and 2, 1898, with Hon. Duncan Sinclair, president, in the chair, and Prof. M. B. Stephens, secretary.

The executive committee presented the following program, which had been previously mailed to each member:

OFFICERS:

President,	Duncan Sinclair.
First Vice-President,	Dr. James L. Bryan.
Second Vice-President,	Dr. G. T. Atkinson.
Secretary,	M. B. Stephens.
Treasurer,	George C. Pearson.
Executive Committee:	E. B. Prettyman, H. A. McComas, H. J. Weimer.

PROGRAM.

1. What more should be done to establish and maintain District School Libraries and Teachers' Libraries?

Paper, - - - - - - M. Bates Stephens, Denton.

Discussion.

John D. Worthington.....Bel Air.
B. F. Lankford..... Princess Anne.
M. J. Perkins.....Cambridge.
Charles F. Kirk.....Olney.
Wm. B. Krout.....Towson.

General Discussion by the Association.

2. Should "School Supplies" be paid for out of the free book fund?

Paper, - - - - - - John E. Edwards, Cumberland.

Discussion.

C. C. Brown.....Pomona.
Elias O. Grimes.....Westminster.
Michael B. Nichols.....Easton.
George M. Joy.....Leonardtown.
Willis B. Burdette.....Rockville.

General Discussion by the Association.

3. Can the present law concerning District School Trustees be improved?

Paper, - - - - - - Dr. J. C. Nicholson, Baltimore.

Discussion.

Thomas H. Williams..... Salisbury.
H. A. McComas.....Hagerstown.
Jos. L. Kerr.....Cambridge.
J. Sellwyn Sasscer.....Upper Marlboro.
George F. Blake.....Elkton.
Z. C. Ebaugh.....Towson.

General Discussion by the Association.

4. Should ladies be appointed District School Trustees?

Paper, - - - - - - Wm. G. Smith, Chestertown

Discussion.

Dr. E. A. Sudler..... Sudlersville.
Joseph M. Cushing.....Baltimore.
Robert Murray.....Cumberstone.
Dr. James E. Shreeve.....Ellicott City.
Robert F. Duer.....Princess Anne.
Henry A. Wise.....Baltimore.

General Discussion by the Association.

5. Should there be a compulsory Educational Law in Maryland?

Paper, - - - - - - - U. G. Palmer, Oakland.

Discussion.

John E. McCahan.....Baltimore.
John G. Wilson.....Cumberland.
Dewees L. Farrar.....Westminster.
H. J. Stevens.....Andersontown.
Asbury C. Riley.....Snow Hill.
Dr. J. M. Corkran.....Centreville.

General Discussion by the Association.

6. The Consolidation of Rural Schools and the transportation of distant pupils at the public expense.

Paper, - - - - George C. Pearson, Hagerstown.

DISCUSSION.

Louis L. Beatty.....Centreville.
J. Frank Parran.....Prince Frederick.
Dr. Zack. R. Morgan.....Mechanicsville.
C. W. Baker.....Aberdeen.
Dr. Robert A. Dodson.....St. Michaels.
Z. P. Wharton.....Stockton.

GENERAL DISCUSSION BY THE ASSOCIATION.

7. The best methods of conducting Teachers' Institutes.

Paper, - - - - - Dr. S. E. Forman, Baltimore.

DISCUSSION.

Alexander Chaplain.....Easton.
Ephraim L. Boblitz.....Frederick.
F. Eugene Wathen.....Annapolis.
Thos. M. Carpenter.....Wicomico.
Philip T. Harman.....Ellicott City.
Dr. W. D. Straughn.....Snow Hill.

GENERAL DISCUSSION BY THE ASSOCIATION.

8. The effects of the introduction of free books.

Paper, - - - - - - George Biddle, Elkton.

DISCUSSION.

Reister Russell.....Reisterstown.
Wm. P. Jamison.....Newburg.
L. F. Kefauver.....Middletown.
Dr. Samuel A. Graham.....Salisbury.
Laban T. Quillan.....Berlin.
Dr. D. E. Graves.....Hyattsville.

GENERAL DISCUSSION BY THE ASSOCIATION.

9. The President shall cause the Roll of the Counties and Baltimore city, to be called to give an opportunity for the presentation of resolutions for the benefit of the Public School System of the State.

10. Inspection of the State Normal School, December 2, at one o'clock P. M.

11. Luncheon, December 2, at two o'clock P. M.

The following papers, which were read before the association and discussed by its members, were requested by vote of the association to be furnished for publication in the State School Report for 1898:

"What More Should Be Done to Encourage and Maintain District School Libraries and Teachers' Libraries?"

M. B. Stephens, *School Examiner of Caroline County.*

The question "What more should be done to encourage and maintain district school libraries and teachers' libraries?" involves two distinct propositions, which cannot be discussed jointly, for the reason their purposes and ends, to be attained, are quite different. The first is intended to be one of the many factors which enter into the proper education of our pupils, and is formed primarily to meet an essential part of their educational needs, while the other deals with the professional side of teaching, and is meant to bring the many school "keepers" to a proper appreciation of the nobility and high calling of the "teacher."

The former is a fact, sanctioned by a law passed nearly thirty years ago, the operation of which has equipped hundreds of our schools throughout the State with this essential factor of mind development; the latter, a theory so far as we are concerned, with no law to justify it and, apparently, with but little moral support to encourage it. We will notice then, briefly, the propositions separately.

Since 1835, when the Legislature of the State of New York took the initiative and enacted a law for the encouragement and maintenance of district school libraries, a majority of the other States have followed with similar library legislation. In nearly every instance the framers of the respective laws, by words of unmistakable meaning, have recognized the principle that lies at the foundation of all legislation for free public libraries that the library is and should be an essential part of the system of public education of the State, and as such should be maintained by public taxation, because it is meant to complement the public school. The inference is strong in all library legislation that an efficient school system is hardly possible without the public library. Imbibing this spirit which was laying hold of the intelligence of law makers, the framers of our Constitution made the following a part of the public school law of Maryland: "For the further encouragement of education, district libraries ought to be established in each school-house district, under the care of the teacher as librarian. For this purpose the sum of ten dollars per annum is ordered to be paid by the Board of County School Commissioners, out of the State School Fund, to any school-house

district as library money as long as the people of the district raise the same amount annually. The books must be selected by the Board of District Trustees." Here is something more than a passive recommendation. They were so convinced of their utility to public school work that money was appropriated for their establishment, and the prerogative of the county school board taken away in every case where the school should raise ten dollars for the purpose. It seems to me the wisdom of the framers of that law in saying that a library *ought* to be established in each school-house district and alleging as a reason therefor "the encouragement of public education," should stimulate every school official to action along this line; for we must either doubt their wisdom by becoming indifferent to the recommendation or wilfully break the law which it is our duty to keep and enforce. The results, after a trial of thirty years, justify the statement that something is wrong somewhere; for not ten per cent. of the schools of the State have libraries. No one has risked his reputation as an educator to denounce or even question the wisdom of the law, and certainly no one can deny that the State has withheld proper encouragement. The bad showing in the number of libraries rests (1) with the examiners and (2) with the teachers. It is possible for a library to be placed in every school, and the county school examiner has not met fully the expectations of the law, nor has he performed his full duty to the educational interests of his county until every school is provided with this valuable adjunct for "the further encouragement of public education." The question naturally arises, "What can be done to increase the usefulness of such libraries as are already established?" The objection is made that the books have not been well selected, and that the use of the library has engendered a habit of careless and thoughtless reading, which is almost as bad as no reading at all. There is abundant proof that teachers and trustees have made, in many cases, poor selections as regards the quality of the reading matter, and in almost every case they select books beyond the intelligent grasp of the average pupil. This objection, however, has been met by the State Board of Education, who published a list of books suitable for a school library and classified the books in such manner that the teacher can make no mistake in the purchase of books suitable to the needs of the pupils. This step has gone a long way toward solving the difficulties of maintaining a library, and yet it is plain that this factor of public education must have further attention before it attains

the ends for which it was established. We would not discourage its use among the patrons for many families are entirely dependent upon the school library for good reading matter and, we doubt not, that through this medium scores of patrons have been brought into a closer touch and sympathy with school interests. But when we consider the pupil for whom it was primarily formed there is a grave doubt whether he receives that benefit which the law contemplated. A school library is designed to impart a wider culture than school text-books can give. Its chief use, therefore, should be to throw light on the lessons, and pupils should understand that it is best not to read for mere amusement only. There must be a well defined object in view. If it were so directed as to be supplementary to the work of the school it would result, finally, in doubling the efficiency of the school, or if it were done skillfully in the line of literary and general culture it would accomplish a result equally as great. But the library, with its present organization, will not do this. There is a missing link between the school organization and the library organization, and school work will be hampered until this connecting link is supplied. Our plea is for a children's reading or literary circle in every school with a course of reading and study incorporated in our schedule of grades, authorized and prescribed by the school authorities. The school library, with a reading circle course for children, would accomplish both purposes above stated. Lack of time will not permit the presentation of a plan in detail. But there could be stated periods, once or twice a month, for such meetings; and apart from any consideration of books prescribed for reading and study, there could be literary exercises to supplement their reading—arranged in such manner as would make the library sought after. The books would become to the pupils wonderful helps in time of need. Every pupil should be a member of the circle and should be taxed a nominal sum, annually, which should be used in providing new books and magazines for the library. In this way the child becomes interested in the library books as never before. He is naturally led there by a desire for information, fostered by the reading circle course, and feels perfectly free to use it, because he has a pecuniary as well as an intellectual interest therein. This plan will bring to every school a library, and the unpleasant task of compelling the patrons to raise ten dollars to meet the recommendation of the law will be obviated. But some one may object on the ground that the

children would not support the enterprise because of the fee required. No apprehension need be felt along that line. Every newspaper in the State would permit the use of its columns to inform parents concerning the advantages which it would bring to their children, and every pulpit would champion the cause. With these two factors at its command objections would melt away like the dew drops before the rays of the sun.

Secondly, a teachers' library is as essential to the needs of the teacher as is a school library to those of the pupil. Had the preparation and equipment of the teachers, necessary for the successful prosecution of their work, been as clearly defined to the views of the framers of our school law as they are now to us, they would have added to the school library law a provision that a teachers' library should be formed in every county, with the school examiner as librarian. If we accept what has been preached, even by teachers themselves, that nothing but a thorough knowledge of the subjects he expects to teach and a little practice are needed to guarantee success, it is useless to make any claims to a teachers' library as a needed factor to increase the efficiency of teachers. I believe some add that *tact* is essential to success, but claim that tact is a native endowment, and its possession cannot be attained by study. This furniture put into the mind from books and observation is important, but not as important as culture or training and professional information. Culture or mental discipline is worth far more to the teacher than information or what is called usually a good education. A teacher may be able to translate with care ancient and modern languages and have no breadth of judgment, no ability of adapting himself to circumstances; in fact almost no one of the many provisions demanded in a good teacher. There are two qualifications found in the really successful teacher more important than the possession of a quantity of facts. The first of these is judgment or what we usually call "Common Sense," and the second is a knowledge of the materials with which he has to deal. "Comman sense" is supposed to be an inherited quality. This is a mistake. Of course the "potentiality" must be present at the start; there must be something that can be educated before an education commences. But after this, correct training gives common sense. Hence there must be some training school or professional reading course where common sense may be obtained. This

acquired, school government becomes an easy matter. Through this influence the teacher will gradually grow in *judgment* education until he will know what to do under the most trying circumstances. Perhaps thousands of teachers in this State have not this culture, and the result is that they fail when brought into contact with pupils and school work. We speak of them kindly and say "they fail for the want of governing ability; they know enough but don't know how to apply it." "The better a teacher is educated the better he can teach," goes without contradiction; but this by no means implies that the more facts he knows the better he can teach. He who can intuitively (from culture) know his pupils thoughts, appreciate their difficulties, meet their wants and adapt his thoughts to their thoughts, his words to their comprehension, can teach; but he who cannot do this cannot teach, no matter how many books he may know. Learning and study are all important. Nothing can take their place, but they must enlarge the powers of conception, make broader the ability to generalize, quicken the observation and make vivid the imagination. "The teacher must have knowledge of the nature of the child, and he cannot possess this only through a study of his own nature, made possible or at least facilitated by a systematic course of reading in psychology and the science of education. As a help to this end there should be in each county a teachers' library, where such books can be procured by our teachers. The school board should establish it and, with some financial aid from the teachers, maintain it. But the library in itself is not enough. The teachers must organize teachers' reading circles, where a prescribed course of study in psychology and books for culture can be followed; where there can be discussed all problems which baffle their skill as teachers and where there can be a full exchange of views touching their profession. Inquiries started at the meetings of the reading circle will reach out for just such books as the teachers' library contains, and the books will be read to satisfy such wants. These meetings or circles, whether formed by the pupils or teachers, give to the libraries an importance not before understood and a usefulness not before realized.

The limited demand for such books as should fill a teachers' library by our teachers is the natural offspring of unprofessional teaching. No other profession has such a poor stock in trade. Our opinion of the lawyer who could prosecute his

profession without a well equipped library would be unfavorable; and, yet for those who would work upon the mind or train, "the most complex of all the tissues woven in the loom of time," we seem to think that research and study are unimpertant. It may be true that a little pedagogy like a little knowledge of every profession is a dangerous thing, but deep down below the successes or failures of teachers lie certain causative psychological principles, to know which would be to control them. As the great educational problems, most of which have been only partially settled, open broader and deeper, one after another; "what shall be included in our courses of study;" "what time shall be given to each;" "what is the educational and practical value of each;" "how shall school work be unified so that we may secure, to some degree, harmonious development in these days of competing specialties?—these and many such wider problems can ripen to full maturity only in an atmosphere charged with professional reading and training and what is made possible thereby, "the accumulated experience of the centuries." The effects of these studies upon the teacher, made possible and practicable by a reading circle course with a teachers' library at command are not always noticed by the casual observer, but they increase his inner life; he loves to grow mentally as well as to foster growth; slowly and silently they increase his potency and earnestness, lift him above petty expedients and reliance on short cuts and patent methods, and perhaps, best of all, secure what is intended, a professional spirit. Let us stop for a moment lauding our school system to the skies and trying to make ourselves believe, and others too, that there is none other like it. There is a serious lack of professional skill among our teachers. To have them comprehend the subject of teaching in its great outlines and master its principles is a need which appeals to the highest and most intelligent effort on our part. A long stride was made in this direction when an institute conductor for the State was appointed. This will begin a new epoch in our school affairs and makes possible many reforms which before seemed impossible. The system will gradually grow, as it should, into a State system, while it is now a county system, with too little uniformity and a lack of hearty co-operation among the counties. Some years ago a State reading circle for teachers was organized, but the time did not seem ripe for such a commendable institution. Many of us failed to give it that consideration which its worth merited, and now realize what

blessed opportunities were missed. We can have a children's reading circle and a teachers' reading circle in every county in the State. They are needed—yes, they are indispensible; and with them there will come to every school house a library, a necessity which the children's reading circle will create, and there will be organized in the office of every school board a teachers' library, as a logical complement to the teachers' reading circle. This done and there will follow an educational awakening such as will deepen our reverence for public education and make us feel justly proud of what it has done for our State.

Should There Be a Compulsory Education Law in Maryland?

U. G. Palmer, *School Examiner of Garrett County.*

In the presentation of this important subject to this representative body of the educators of Maryland, I owe an apology for the brief, hasty and illogical preparation of the same due to the fact that no notice that my name was placed upon the program reached me until seventy-two hours ago.

While I acknowledge that all representative school men should have well defined ideas on this question, and be prepared at all times to set forth good tenable arguments for their position, I must confess that I feel that this occasion, and the character of the men who constitute this convention, demand from me a much more exhaustive discussion of this matter than I am able to give on so short notice.

I believe that it is the paramount duty of the State to educate its children to make good citizens out of them. This is the rock on which I stand.

Of course this position is not without assault. Allison, in in his "History of the French Revolution," claims that education as shown by its results does not tend to make good citizens. Herbert Spencer and Buckle both discover in their "Researches in Social Statistics" and the "History of Civilization," that crime remains a constant quantity in any nation for all time, and can be predicted with the same certainty as the tides or eclipses. And in our own land violent attacks have been made upon the efficiency and results of our school system by such representative thinkers as Richard Grant White and Judge A. W. Tourgee.

But the criticisms of these able men all seem to admit of plausible explanation. We all acknowledge that our schools are far from perfect, that while we are not making good citizens of quite all the pupils no one can estimate accurately the number who do become good citizens through their instrumentality, and the few who do not become such *in spite of* the system and not *on account of* it.

Fifty years ago Edward Everitt said: "Education is a better safeguard of liberty than a standing army. As you retrench the wages of the school master you must raise those of the recruiting sergeant." Little did he think as he studied out this literary jewel that in the light of cold scrutinizing science, the records of coming years would bear him out in his assertion. But do they? Dr. Wickerham, in his report to the Bureau of Education, says:

(1.) That about one-sixth of all the crime of all the country is committed by persons wholly illiterate.

(2.) That about one-third of it is committed by persons prodically illiterate.

(3.) That the proportion of criminals among the illiterate is about ten times as great as among those who have been instructed in the elements of a common school education.

These were his conclusions after an exhaustive comparison of the literacy and illiteracy of the inmates of the penitentiaries, jails, workhouses and houses of correction of Pennsylvania.

Dr. Mansfield, after a careful study of the criminal statistics of more than half the States, declares:

(1.) That one-third of all the criminals are totally uneducated, and that four-fifths are practically uneducated.

(2.) That the proportion of criminals from the illiterate classes is at least tenfold as great as the proportion from those having some education.

And the result of Dr. S. H. White's New York city investigations is that a person who cannot read or write is nine times as liable to commit crime as an educated person, and Dr. Charles L. Brace states as his reason therefor that "a very small degree of mental training or intellectual tastes is a preventive of idleness and consequent crime."

The State School of Michigan is a school "to save children who are in danger of becoming criminals before they have actually become such." The superintendent, in his report of

the results of their work, says: "Enough is known to satisfy us that there are very few of the children who go through the school who will not prove as good in morals and in life as the average children of the community. I could not put the average as low as 5 per cent."

And we must conclude that education is the most potent force in the land today tending toward the development of good citizenship.

To educate our children we must get them into our schools. If it can be done without a compulsory attendance law, all is well, but I can name twenty school house districts which have come under my observation in which today are children growing to manhood and womanhood (almost within the shadow of the school) who are spurning their opportunities, and thus becoming ten times more liable to swell the criminal class of the future than they ought if there were a way provided to bring them under the influence of the school which is maintained for their benefit.

They complain that such laws deprive them of their liberty—their inalienable rights—to *compel* them to attend school.

There are thousands of citizens within this State who do not believe in public schools and public education. Does the taxgatherer respect *their* liberty, their inalienable rights, and excuse them from paying their share towards the support of the public schools?

If we take away a man's liberty by making him pay a tax for the support of the public schools, hasn't the taxpayer the right to demand that all children of proper age shall attend and receive the benefit derived from the expenditure of his money?

And this matter of compulsory attendance is no new fangled idea. The Prussian system was inaugurated in 1763—nearly a century and a half ago. It provided for the compulsory attendance of all children between five and thirteen years of age, daily in winter and twice a week in summer.

Minute provisions were made for the punishment af absentees. It was somewhat military in its nature. It caused great commotion in Europe, and other countries tried to imitate it. This system, in its amended and perfected form, has been in almost continuous operation ever since the days of Frederick the Great, and is the greatest monument ever erected to any German monarch.

The matter of compulsory attendance has been thoroughly tried in this country, two-thirds of the States today having such a law, in one form or another, in active operation. The Massachusetts law is nearly fifty years old, and a dozen States have had a compulsory law for a quarter of a century.

It would not be wisdom for us to be the first to adopt a new idea nor the last to put aside an old one. But it seems to be just now the proper time for us to strike a happy medium and decide to enact a mild compulsory attendance law, say for sixteen consecutive weeks per year for pupils between eight and thirteen years of age.

Of course public sentiment must be in accord with it to make it effective, for the enforcement of any law depends largely upon its popularity.

In the framing of the laws of the various States two different ideas seem to dominate them. Massachusetts is the finest example of the law under local management, while Connecticut has the centralized system, in which the State executes the law, assisted by local agents.

Both kinds of laws are effective in accomplishing the objects designed. But the Connecticut law—the centralized idea—seems to be the most effective.

It is found in all communities that a very small part of the population is affected by the compulsory attendance law; that the great mass of children are in school whether there is a law or not. But this small part of the school population embraces the very ones who need the benefits of the schools the most.

In Massachusetts, a century ago, it is found a larger per cent. of the school children were in school than were just previous to the enforcement of the compulsory law. The coming of a large foreign element, the establishment of large manufacturing industries and the consequent non-attendance at school alarmed the school authorities and led to the enactment of their law.

The circumstances were such and the conditions attendant upon its enforcement were such, that the efficiency of it was made to rest with the *local* authorities.

Different conditions seemed to prevail in Connecticut, and the initiative in the matter of its enforcement there was placed in the hands of the *State* authorities.

A careful study of the provisions of the two systems, as in active operation in the various States, and a comparison of the conditions in Maryland with those which gave rise to the laws elsewhere, would enable us to determine the most effective system for our adoption.

All laws, to be effective, must provide a penalty for their violation, and a compulsory attendance law is no exception. And in providing the penalty we should keep clearly in view that the end to be attained at all times is good citizenship.

Punishments should be related to offences as causes to effects. The law should provide suitable places for "confinement, discipline and instruction" of habitual truants. Good citizenship is the end.

The responsibility for the enforcement of the law should be put squarely upon the shoulders of the school officials, and the withholding of the State appropriations or other effective methods provided for its violation.

In conclusion, if this statement of Dr. Withersham is true, "but with all its defects, we are well convinced that the system of public schools is the most potential agency by all odds at work among us today to root up vice, to lessen crime, to lift up the people to a higher plane of civilization and to save the sacred principles of republicanism our fathers planted on American soil and bade us cherish with our lives, our fortunes and our sacred honor," then let us leave no stone unturned which will add to the efficiency and effectiveness of the scheme of universal education and take the next step forward by the enactment of a compulsory attendance law.

The Best Methods of Conducting Teachers' Institutes.

S. E. Forman—*State Institute Conductor.*

The subject before us at this hour is probably the most practical and important on our program. We may or may not have compulsory education; we may or may not consolidate the rural schools; we may or may not enter upon the policy of appointing ladies as trustees; but we will have Teachers' Institutes, and we will have them at once. I hope, therefore, the question before us will be discussed fully and freely, and that we shall learn from the discussion something that will help us in the work of conducting institutes.

First, permit me to call your attention very briefly to the history and present status of institute work in the United States. The Teachers' Institute is as old as our public school system and as general. It is a feature of all administrative systems of education, whether of an appointive system like our own, or of a half-appointive half-elective system like that of Pennsylvania, or of a wholly elective system such as prevails in New England. It was first established as a means to supply teachers for the schools. As soon as a State undertook to furnish a free education to all its children it found there were not enough teachers to teach the children. The Normal School did not supply enough, and the institute was devised to complement its work. About sixty years ago Henry Barnard, in the city of Harford, conducted the first Teachers' Institute ever held in America. About fifty-five years ago, with money from his own pocket, Horace Mann helped to found the institute in Massachusetts. About fifty years ago the first Teachers' Institute was held in New York. In this morning's paper we read that the teachers of Cumberland county, Pennsylvania, are holding their forty-fifth annual institute. And likewise in the west, in Ohio, in Illinois, in Wisconsin, in Utah, the institute began when popular education began and grew with its growth. In the south it has had the same history. As education has become more general there, institutes have become more numerous and more popular. In almost every State of the Union the institute is an integral feature of the educational system. It holds its own by the side of the Training School, the Normal School, the High School, the State University. In the last report the agent of the Massachusetts' State Board of Education says: "The great value of the five days' institute has been fully demonstrated." In New York, Superintendent Skinner, in his last report, says: "Our institute system needs no apology or no defense." In Indiana, according to a recent report, 13,000 out of 14,000 teachers attended an institute. Throughout the whole country about three-fourths of the teachers in the public schools come under the influence of this agency of popular education. Thus we see this institution is broad and deep. It has sixty years and forty States, and the most enlightened teachers of the past and present on its side.

In our own State the institute has had a broken history. As in other States it began with the introduction of our public school system. In 1865, when the Normal School was

established, the law provided that the faculty of that school should teach one-half the year at the Normal School and the other half at institutes in the counties. In 1868 the law was changed, and the faculty was directed to teach nine months in the Normal School and one month—the month of June—at institutes. It was found under this arrangement that during that month in many counties the schools were closed and the teachers scattered. So in 1872 the law was changed to something like the present form. Under the law as it existed prior to the last session of the Legislature, it was found impossible to hold institutes regularly in all the counties. The multiplying duties of the principal of the Normal School made it impossible for him to give much time to outside work, and it has come about that in many of the counties institutes are seldom held. In a few of the counties there has never been an institute held. At its session in 1898, as you all know, the Legislature amended that law providing for the regular holding of these meetings in all the counties.

It has, therefore, now become necessary for all persons connected with our schools to do some careful thinking about Teachers' Institutes. What is a Teachers' Institute? This question is easier asked than answered. It may throw light on the question to learn what it was in its early history. In a report of a superintendent of education in Connecticut, in 1845, we have the following account of an institute of that year: "More than three-fourths of all the persons employed to teach the public schools last winter were assembled together for four or five days, during which time instruction was given by experienced teachers in the theory and practice of school keeping. The regular exercises during the day were interspersed with discussions in which the members of the institute took part. The good accomplished incidentally in the several places where the institutes were held, by awakening parental and public interest, and disseminating sound views on important topics of school government and instruction and on the duties of parents to teachers and to schools, was worth all that the institute cost the State; but the direct and anticipated results of the institute—the bringing of teachers from different towns in the same county to an acquaintance with each other, and to a knowledge of each other's experience and methods; the presentation and exemplification by experienced teachers of the methods by which they have gained success, the breaking up in the minds of young teachers of radically wrong notions, the impulse of self and

professional improvement, the desire to read, converse and observe on the subject of education—these results have been realized as fully as the best friends of the measure promised."

Since these words were written—more than fifty years ago—there have come over institutes, as over other things, some changes, but the chief purpose of the institute remains, namely, to inspire the teacher to a more intelligent and a more earnest pursuis of his work. But how shall this inspiration be accomplished? What kind of work will do the teachers the most good? What is your program for arousing zeal and higher endeavor? Evidently it is easier to speak of these things than do them.

As far as I can discover, there are two types of institutes in favor among educators. In one the time is taken up principally in lecturing, exhorting, entertaining, amusing, moralizing, theorizing; briefly, in talking. In the other the time is devoted chiefly to the subject matter of the teachers' daily work, to methods and illustrations of methods, to imparting the elements of some new branch of instruction, to discussing the management and control of schools; briefly, to teaching. The first type is fairly well characterized by one of its champions in these words: "We want the coming together of life with life, spirit with spirit, soul with soul, deeper than any particular professional characteristics, and that we secure in our institutes by getting broad men, by getting strong men, by getting men who will lift the profession out of its ruts and lift it by their aspirations and inspirations." The second type contents itself with severe technical work from Monday until Friday. The difference is radical; it is difference of kind.

Here in Maryland we can afford to be slow in committing ourselves fully to either of these types. We may frame our ideal for an institute, but we shall probably have it broken twenty-three times a year. In New York, where the State sends out a full Institute Faculty to take possession of teachers, examiners and local authorities, an ideal institute may be approximated. But not in Maryland, where but one worker is sent to the county and where institutes vary in size from thirty to 300 teachers. Here, keeping the chief aim before us, we must adapt ourselves to the traditions and conditions of the county, and make the best use of the forces at our command. One of these forces must be the best teachers of the county. We must avail ourselves in a systematic way of

the teaching talent of the county, whether we wish to or not. And I am not quite sure that it is not better for the teachers that we are compelled to call upon them. It is all very good "to bask in the sunshine of great souls," as an advocate of the talking-type of institutes puts it, if you don't have to bask too long, and five days is a long time to bask. Where the institute is small I am almost persuaded that it is best to have the teachers of the county participate in the work of the institute to a large extent. If this can be done they will give as well as take away. After all, teachers will get out of institutes very little more than they put into them. If they wish to carry away the wealth of the Indies they will have to bring the wealth of the Indies with them. I am inclined to believe that if the teachers of a county feel that the institute is a place where any one, who has something worthful to say, may be heard, they will try to have something worthful to say. They cannot feel this way if all the time is monopolized by a few on the platform. Whatever may be thought of the soundness of this doctrine it is certainly the principle that must guide us in the institute of many counties.

It is the examiner upon whom the task of bringing out the best that is in his teachers will fall. Throughout the year he will have to keep his eyes open for the program. Whenever he sees a teacher excelling in a certain line, he may request that teacher to make preparation in that line for the next institute. If the very best work of the county is presented at an institute, that institute can hardly be a failure. Indeed, experience teaches that the best work often comes from local sources.

It is not my purpose to present a theory of institute work. It would be folly to do so before I am more fully acquainted with the needs of the teachers. But I do want to urge this body to try to make the institute truly profitable. To do this the State authorities must have the active sincere co-operation of the local authorities. Cold neutrality will not do; that is often worse than open resistance. How can the examiners help in this matter? I will venture to suggest a few things for him to consider:

(1.) The examiner should learn as much as possible about institute work. He cannot learn much upon the subject from books, but he may learn much by visiting. He may with great profit and with little trouble attend the institutes held in neighboring counties. A trip into New York or Pennsyl-

vania, where institutes have reached a high stage of development, would richly repay the outlay of time any money.

(2.) He may create sentiment in favor of the institute. If he believes in the work he should try to get others to believe in it. He may encourage patrons and school officers to attend upon the sessions and observe the work done in the institute. The presence of such visitors is always desirable.

(3.) He may be of great service by being business-like with the teachers in reference to punctuality and regular attendance. If he is not strict on these points, there is danger of the work being impaired by shirking of duty, tardiness and absence.

(4.) The institute should be held in a central town, and in the most suitable building in the town. If the body of teachers does not number above one hundred, a large school room, if one is available, is the best place for the day sessions. For larger bodies of teachers the town hall or opera house is sometimes more suitable. There should always be a liberal amount of space reserved for the public.

(5.) School apparatus should be at hand; especially a blackboard, a globe; if convenient, reading charts and maps.

(6.) A competent musical committee should be appointed and a piano or an organ secured. The musical talent of the community may be exploited for the benefit and entertainment of the institute.

(7.) The examiner may contribute greatly to the comfort of his teachers by ascertaining beforehand at what houses and at what rates teachers may secure board. Especially in this provision wise in smaller towns.

(8.) The social side of life should not be forgotten during institute week, and no pains should be spared to add to the teacher's enjoyment in this direction. It is sometimes found practicable to devote one evening to a reception or gathering of the teachers where all may become acquainted. The teacher's life is often dreary and solitary. If possible the institute should be made the occasion of quickening his social nature.

(9.) Arrangements should be made for two or more evening entertainments of a public nature. The details of this feature of institute week must follow the taste and custom of the locality. A lecturer of wide reputation usually solves the problem of the evening entertainment in a satisfactory manner.

(10.) The good will and interest of the press and pulpit should be won.

These are a few of the things that will help to make good institutes, but of course they are not all. Many valuable suggestions will doubtless be made in the discussion that is now to follow. In closing allow me to express the hope that we shall have the aid of every one present in our efforts to make institutes what they ought to be, an inspiration to our teachers in their work and in their life, and thus make them a blessing to our State.

The Effects of the Introduction of Free Books.

GEORGE BIDDLE—*School Examiner of Cecil County.*

Books are to the school child as tools to the mechanic, indispensable. Books are as necessary as the teacher. If the interest of the citizen is advanced by the State supplying the one, the other is equally necessary. Can any one be found who does not believe that a State, a community, is benefited by all children being educated, being taught to think, to think rapidly and accurately, so that prompt, intelligent action may follow?

In this age it is a self-evident fact that the educated nation leads. How then can we best promote the welfare of our people and advance our State and nation to the front rank?

For years Cecil county had a system of renting books to the children, and supplying free of charge those whose parents were unable to rent. Under the law those who desired to purchase their books could do so. Under this system every child had or could have the necessary books, so that the effect of the free book law should be, and I presume is, much less in Cecil than in counties where all of the children had to furnish their books.

Books at times may be changed for the benefit of the publishers rather than the children, and with, perhaps, but little advantage to the latter; but sometimes changes must be made, and in some branches, notably physics, where new discoveries are being made almost daily, changes must frequently occur.

Experience shows that change of text-books, even under the most favorable conditions, involves expense.

All will admit that in school there must be a uniform system of grading and of text-books.

Difference in text-books call for more classes, more of the teacher's time, and correspondingly, less advance on the part of the pupil.

How are we to secure this uniformity of text-books? Under the old system of children furnishing their own, the child would and often did come with a book that had been in use in some other place, perhaps the one that mother used, and thus there were nearly as many kinds of books as children. When told that the teacher could not form classes, the reply came, "well, I can't afford any other—use that."

You who have been teachers know something of the troubles in classifying under such conditions.

Again, when they were rented or furnished to those unable to pay, many people did not care to be in the eleemosynary class. I have had more than one to ask that a free permit be not required, with "I am not able to pay today, please let John have the books, and I will pay in a few days. I do not want my child's name among the free scholars."

The free book law does away with all of this, every child has as many books as are necessary. All have the same kind of books. Classes are uniform and much larger, hence fewer in number, and thus more time is left for each class.

The friction and heart-burns that often occurred as between the rich and the poor are banished; all are on an equal footing, all have an equal chance, all have the necessary material, and that of the best, with which to work.

The result is inevitable. The children love their school and studies. It is a place of pleasure. Absenteeism is lessened, school is more easily managed and in every way is better. Progress is to be seen on every side. The enrollment is much increased.

In our county, and please remember that the poor could at all times have the books for the asking, we find that the free book law has increased the enrollment nearly 600, or about seven and one-half per cent.

This alone would justify the expenditure of every dollar that our books cost.

The present law is an advance ,but it has gone only one-half of the way.

Are not copy-books and crayons of equal importance with histories and geographies?

Let us then make another advance, grant all needed school supplies, such as come under the general name of stationery.

With all needed supplies and those of a uniform nature, classes will be greatly reduced in number, more time given to each class, and thus each pupil made to fully comprehend the lesson while in that class.

Let love be the magnet that draws the child, rather than a compulsory law.

May the day be near when every child shall be found regularly attending school.

To this end, there is not a more potent lever than the free book law. It is here, and here to stay. It is here to advance until every child within our borders is prepared to take an active part in the world's progress. Bacon has said: "Knowledge is power." Gross adds: "Knowledge is not power, education is power."

> "A sacred burden is this life ye bear,
> Look on it, lift it, bear it solemnly,
> Stand up and walk beneath it steadfastly,
> Fail not from sorrow, falter not for sin,
> But onward, upward, 'till the gold ye win."

The Construction of New School Houses with Limited Means, and the Best Plan for Ventilation.

ALEXANDER CHAPLAIN.—*School Examiner of Talbot County.*

In one of my reports to the State Board of Education, made several years ago, may be found the following: "The study and experience of many years satisfy me that school buildings in the rural districts should be sufficiently commodious to give teachers and pupils pure air and ample working room; and, for this purpose, the house should be twenty-four feet wide and forty feet long, from out to out, with the ceiling from ten to twelve feet high. If ten feet be cut off, for the purpose of making three rooms, you can have separate entrances and cloak rooms for the boys and the girls, and a private room for the teacher to use as a library and apparatus room. Libraries and the necessary apparatus for good schools will, most probably, not be accumulated, unless the teachers find some place provided for the preservation of these impor-

tant school appliances. The fuel room should be built in connection with the house, at the rear, with an inside communicating door. Convenience, comfort and economy make the fuel room a matter of great importance. The chimney should be built from the ground, with two flues—a smoke flue and a foul-air flue. By means of a cold-air box, fresh air should be introduced from the outside and passed through the heater, which will insure pure heated air, distributed equally in all parts of the room, when convection is properly established through the use of the foul-air flue."

This general outline for the construction of an ordinary school house, with one school room, I wish to modify in one particular: the width should be increased two feet; and even four feet increase, for some reasons, would be better. With this increase in width, there should be a corresponding increase in length; for it has long been settled that the form of the school house best suited for easy supervision by the teacher should be a parallelogram, the length of which is one-fourth or one-third greater than the width. Taking, then, the width of the house as twenty-six feet, from out to out, in an ordinary frame structure you will have a school room twenty-five feet wide in the clear, which can be divided between the necessary aisles and the spaces occupied by desks, as follows: Four rows of double desks, the average length of the double desk being forty inches, will require thirteen feet four inches; two side aisles, each three feet wide, takes six feet more of the width of the room; and leaves for the three aisles, between the four rows of desks, twenty-two inches each.

In calculating for the depth of the school room, or the length of the parallelogram in the clear, you must take into consideration the following: First, teacher's platform, minimum width five feet, maximum width six feet, with preference in favor of the maximum width; second, working space between the front of the teacher's platform and the front row of desks, minimum width three feet, maximum width six feet; third, space in the rear of the room, for calisthentic or other exercises, for the heater, and for the swing of the doors leading to the fuel rooms or other rooms at the rear of the building, minimum width three feet, maximum width six feet; fourth, space for the rows of desks to be determined by the number of sittings required for the pupils.

When you have fixed upon the dimensions of the school room, cloak rooms, fuel rooms, teachers' rooms and the

building has been methodically planned to meet all of the requirements, the next thing to be determined is its

CONSTRUCTION.

The materials used in the construction of the school house will generally be determined by their relative cost, and the amount of money appropriated for the building. As nearly all of the school houses of the counties are reported as "Frame," we are, of course, more particularly interested in the nature and value of wood as the principal material used in building school houses. It is unnecessary to state a proposition so well known as that heart wood will resist decay much longer than sap wood, or that wood properly seasoned will last much longer than green timber. There are two agents of decay in wood—wet rot, dry rot. The first is caused by a chemical change in the vegetable matter, sugary, albuminous, mucilaginous, etc., held in solution in the hollow fibers of the timber; and is, in reality, fermentation pure and simple. Dry rot, however, is of vegetable origin; and the vegetation that produces it is of several different species, and all belonging to the natural order of fungi. Learned and exhaustive treatises have been written upon the subject of rot; and it is too broad and extensive to be discussed here. But we would remark that wet rot always precedes dry rot, and produces all of the conditions favorable to the growth of the plants which feed upon the substance of the wood and reduces it to dust. Even if seasoned heart wood be used for sills and floor joists, placed near the ground and upon brick piers or walls, it will gradually absorb moisture from the ground and the porous bricks in sufficient quantity to dissolve the sugary, albuminous, mucilaginous and other vegetable matter in the hollow fibers of the timber, and fermentation or wet rot will begin its work of decay. Wet rot, in its turn, invites the ravages of dry rot; and destruction is a question of time, depending for its length only upon the surrounding conditions. Apart from other considerations and reasons, then, you will appreciate the desirableness of dryness of soil and good drainage in selecting a site for your school house. The best material for sills and floor joists is heart Georgia pine, seasoned, of course. This is expensive, but the most satisfactory of all timber. If the amount appropriated for the school house compels you to use the cheapest materials in its construction, such as our Maryland pine, I advise that your sills and floor joists, and, indeed,

the whole building be treated with copious lime baths, which can be done by cheap, unskilled labor at very slight cost. The chemical effect of lime upon wood is to somewhat change the nature and conditions of the sugary, albuminous and other vegetable substances held in the hollow fibers of the timber, and to arrest fermentation or wet rot. The mechanical effect of lime upon wood is to close somewhat its pores and to arrest the absorption of moisture. The best plan is to prepare a rough box in which to place your sills and floor joists, and after sprinkling quick lime over the timber to slack it, and thus let it penetrate and coat the wood. The next best plan is to whitewash the sills, floor joists, and, indeed, all of the framing of the building, except, perhaps, the ceiling joists, rafters and upper timbers. The siding, however, should be whitewashed both on the inside and the outside, if it be the ordinary cheap Virginia, Maryland or North Carolina, I always prefer that a cheap siding should not be dressed, whether it be painted or whitewashed; for dressed Virginia, Maryland or North Carolina siding will not hold either paint or whitewash. Indeed, dressed cypress holds paint quite indifferently; and the only satisfactory wood for outside painting is white pine.

In a school house twenty-six feet or twenty-eight feet wide you use, of course, three long sills. The third sill, placed in the center upon piers, serves to divide the span of the floor joists, and while it enables you to reduce the size of your joists and the cost of the building, the floor to be supported is made firmer and more satisfactory.

The floor should be double. The first floor, or more properly the floor bed, for the purpose of bracing and stiffening the joists, should be laid diagonally, and may be of low quality, or No. 3 Virginia flooring. The second floor, or the floor proper, should be of edge-grain heart Georgia pine; or if rock maple is not too expensive, the best of all floors can be made from this close grained wood.

The ceiling should be laid with material to match the wainscoting; and, in order to make it perfectly tight it should be covered between the ceiling joists with felt paper. For obvious reasons, the ceiling should never be plastered.

If the roof be made of shingles, in order to keep out snow, it should be covered with felt paper before putting on the shingles.

The walls should be plastered from floor to ceiling, and the wainscoting put on over the plastering.

When all of these directions have been carried out in the construction of the house, you will have a school room as nearly air-tight as it is possible to make an ordinary, cheap frame building. The nearer the room approaches to being completely air-tight, the better can its heating and ventilating be effected and controlled.

The chimney of the school house should be built with two flues: one to act as a smoke flue, and the other as a foul-air flue, used as one of the necessary and important parts for the ventilation of the room and heating it by convection, and circulating through its entirety pure heated air.

By means of a cold-air box, opening directly under the heater, furnace or properly jacketed stove, pure air is introduced from without the building, and after being heated is delivered into the room from the top of the heater.

If fresh air is introduced into a room, a corresponding provision must be made for the escape of foul air; for only as much pure air can be brought in as the ventilating shaft discharges foul air. The ventilating flue, therefore, should be large enough to insure the free circulation of the pure heated air through the room in the full measure and capacity of the cold-air box and the heater.

The opening into the ventilating flue should be at the bottom, on a line with the floor, and in size should equal, at least, the area of the mouth of the shaft. The products of respiration sink, at first, to the floor, and being caught into the lower circulation, towards the opening described, are swept into the ventilating shaft and carried out at its top. The tendency of the fresh heated air from the heater is to rise, move along the ceiling to the further end of the room, where it descends and enters into the general circulation of the room towards the ventilating shaft.

In theory and in fact the ventilating shaft will discharge more foul air in extremely cold weather than in moderately cold weather; therefore, in ordinary weather all artificial ventilation is imperfect and needs to be supplemented, at proper and convenient intervals, by throwing open the doors and windows to the free and full sweep of the winds, while teacher and pupils take exercise in the open air. The natural ventilators, then, of the school room are the doors and the windows; and, for this purpose, the windows should be

double hung and easily handled, both from the bottom and the top.

Several years ago a communication from the Secretary of the Maryland State Board of Health was published in several newspapers, from which I quote as follows: "Every school room should have at least three hundred cubic feet of air space and twenty-five feet of floor for each pupil. Thus, a room thirty by thirty and twelve feet high might contain thirty-five pupils and the teacher, but this will answer only when their is good ventilation—a ventilation which would introduce 72,000 cubic feet of fresh air every hour, and change the entire air in the room four or five times an hour."

The amount of fresh air allowed to pupils by Dr. Chancellor, in the aforegoing communication, is upon the basis of the amount allowed the hospital patients. Have we any school buildings, however modern in construction, that pretend to supply even half this amount of fresh air by artificial ventilation? I think not. We have in Talbot county several school houses in which the entire air of the school room is changed, by the means of heating and ventilation that I have endeavored to describe, three or four times every hour, in extremely cold weather; but this supply of fresh air gives to the pupils less than half the amount demanded by Dr. Chancellor.

Uniform and reliable ventilation can only be secured by expensive appliances and fan machinery, which cannot be thought of for our ordinary and simple school buildings. But when it is asserted by those who have given the subject most attention, that one-half of the diseases that afflict the human race can be traced directly to the breathing of impure air, and that children are many times more sensitive to atmospheric poison than adults, it is a crime for those who have charge of the business of planning and constructing our school houses to neglect to provide them with at least some simple and economic means of ventilation.

Should "School Supplies" be Paid for Out of the Free Book Fund?

JOHN E. EDWARDS.—*Examiner of Allegany County.*

The term "School Supplies" is so broad and virtually covers so much, that to consider our subject logically and expedi-

tiously it would be well to separate it into two classes of supplies: first, "School Supplies" to belong to the school as a whole and to remain at all times in the school; and, second, "School Supplies" furnished the pupil individually and entrusted to his care, as free books now are.

To the first class will belong maps, charts, globes, cyclopedias, manikins and the like; to the second, tablets, copy books, blank books, pencils, pens, pen holders and ink.

As the free text-book law now stands, we believe it should be construed to cover the purchase of reading charts, at least, but it shall be the purpose of this paper to show that the present law should be amended so as to include specifically, charts, maps, globes, cyclopedias, manikins and the like which we have denominated "school supplies of the first class."

Why should the articles just mentioned be furnished from a free fund?

First, because they are *necessary* supplies; and, second, because our general fund will not admit of any expenditure in that line. Let us consider the chart, particularly *the reading chart*, as a necessary supply. When may a supply be termed necessary? First, when it is a help to both child and teacher; and, second, if it be time-saving, and conflict with no part of the regular scheme.

Any one who has taught children, of the first grade especially, knows that the greatest difficulty in class work is to obtain concentred, or we might say unified attention—to get each individual member of the class to put his mind upon the same identical thing as each other member of the class. I contend that in teaching a class composed of from fifteen to twenty-five children from six to nine years of age, for example, no teacher, however earnest he may be, can obtain the same results with a book in the hands of each child, as that same teacher can obtain with no book, but instead with a chart before the class, to which he may direct the attention of the class as a whole. In the one case he tells the class to look at a certain letter or word, or whatever it may be; in the other he directs the look to the particular letter or word required, and there can be no mistake on the part of any one member of the class through misunderstanding, or lack of interest or slowness of mind.

Another thing—just as there are currents of magnetism and currents of motion with attendant attraction, so are these

currents of thought. And when a number of people or even children concentre their attention upon a certain object or idea, the thinking or thought of one helps that of the other and receives help in turn; and the final result is so much the greater and stronger. In both cases the chart is a wonderful help, both to teacher and to pupil.

Moreover, it is time-saving. Blackboard work should accompany the use of the chart, no matter how complete, but without the chart the blackboard must be in fact too often resorted to. I say too often because that it takes the time of the teacher, not only from the particular class, but also from work with the rest of the school. Child-teaching demands a wonderful variety of material, and also a variety of means of presenting each new idea. And to be successful, the teacher should be supplied with every possible help. As stated in the first part of this paper, we believe that it would be consistent with the sense of the present free text-book law to supply the reading chart from the free book fund in schools where the chart is preferred to the reader, principally because the chart is nothing more nor less than an enlarged first reader, used by the class as a whole, in place of the book used by each individual member of the class.

The number or counting frame should next be considered as a necessary supply. Here, it seems to me, no argument is needed to establish the fact that the object in question is both a help to teacher and pupil, and that it is time-saving. The same statement, however, applies to the counting frame, as was just made with reference to the chart, viz: that it does not furnish all the needs in this direction. The blackboard must again play its part. The child must be taught numbers in a variety of ways. He must be shown that the same numbers which apply to the little spheres on the frame also apply to all other objects, for example—there can be five desks or five fingers, five marbles, five children, five apples, five books, and so on as well as five little balls as he conceives them on a frame. He must learn five strokes, five dots, five letters as placed on the blackboard. But the value of the frame cannot be expressed. It is always there, always ready for use—it is valuable alike in the first instruction in counting, in addition, in subtraction, in multiplication and in division. In our estimation no adjunct is more necessary. It goes for the saying that it is a time-saver, and is hand in hand with whatever other means may be employed in number work.

And now what of the globe! Is it necessary? Is it time-saving? It is *so* necessary that it should be in the hands of the child from the very first lesson in geography to—I was about to say the quitting point—but it would be truer to say, to his quitting point. Have you ever given a class of children their first instruction in geography? or an advanced class any technical work in longitude and time? Could you illustrate your talk to them with perfect satisfaction to yourself without a globe? A short time since, when visiting one of our schools, I had occasion to ask a twelve-year-old boy, whom I was hearing to recite, what was his idea of the size and shape of the earth.

His reply was to the effect that "it was right smart long and about as wide, and that it was sometimes flat and then again had hills on it;" but he could not quite grasp the idea that it was round. He remembered that he had been told so time and again, but he could not quite realize it. The picture is not overdrawn, and I know that those of you who have visited schools not thoroughly equipped have met with that same experience, or with some still more incredible. One lesson with the globe would not perhaps have given him the complete idea, but constant use of it certainly would. The globe is not only useful in classwork, but is of even greater value as a reminder. When a child has become tired of studying and of looking at the pictures in his geography or history, and his eyes roam around the room and settle first on one object then on another, if there be maps or a globe in the room they are sure to come in for their share of inspection, and indirectly help educate him. As a time-saver the globe shows to the best advantage in explaining distances and the relations of positions or locations. I should be satisfied, with a good large globe in my room, to do without maps, but if the globe be a miniature affair, I should certainly want maps in addition—but by all means a globe.

All that has been said of the chart and globe and number frame applies equally to the manikin, but in a certain sense the last mentioned might perhaps be considered the most needed or useful adjunct of all. Can we not conceive of cases were a rather thorough knowledge of the location and relative position of the various organs and vital parts or of the office of the arteries might be of greatest service in saving one's own life or that of another? Everyone knows that such knowledge can be acquired neither from mere description nor from book illustrations.

And now, after we have our schools equipped with charts, globes, maps and manikins, there will still be something more to work for. In my humble opinion the equipment will not be complete until we find in each school a standard cyclopedia for the use of the teacher and, in his presence, of the older pupils.

Even our teachers, who are oldest in point of service, are sometimes unable to answer perfectly legitimate questions asked by older and even by younger pupils. I myself at times, as a teacher, after having taught a certain subject for several years, and becoming, as I thought, somewhat familiar with it, have been almost dumbfounded to have some young inquisitive mind propound a question that I had never even thought of. No matter how well the teacher may prepare each day's lesson as he finds it in the adopted text-book, or supplements it with work from others, he may always expect to meet with queries that will take him back of most, if not all, text books to a more technical discussion of the topic. Nine-tenths of our children either have no cyclopedias in their homes, or if they do have them there are unable to consult them properly. We cannot expect our teachers to purchase them either for their own use or that of the school. It rests with us to put them into the hands of teachers and pupils together. And not until they have been supplied can we expect that full, round, complete school work we are all laboring for.

And now a few words as to the supplies which we denominate supplies of the second class, viz: tablets, copy books, blank books, pencils, pens, penholders and ink. Some day, when we shall have succeeded in placing the supplies of the first class on the free list, I shall be in favor of culminating the policy by placing the second class in the same category. I would that day were here! I would that we might open the windows to the slates and put tablets in their place. Whatever advantage may be claimed for the slate, it will always remain a filth and disease breeder, in our country schools especially. But to win, we must move patiently—first, free books; then free charts, and, at last, free tablets.

And now having set forth that certain supplies are necessary for good school work, let us consider how they shall be procured. In the first part of this paper the statement was made that they should be paid for from a fund, such as the free book fund, because our general fund would admit of no expenditure in this line. Here, again, I believe argument

would seem superfluous. Rents, repairs, new buildings, teachers' salaries speak for us. What county in this whole State is perfectly satisfied either with the number of school buildings it now possesses or with their condition? Are they all in perfect repair? Are no more needed? Is the school term as long as it should be? Are the teachers being paid as much as they should be? I venture to reply that there is not a single county in the State where double the amount of the present general fund, could not be most judiciously used in the lines suggested and where double the amount is not really needed.

If our law-makers have seen fit to enact a free text-book law for the benefit of the people and children in this State, do you not think that they could be led to see that it is just as important, or even more so, that charts and globes and cyclopedias be furnished free?

I believe that if the School Commissioners of all the counties of the State of Maryland should join heads and hands our present free text-book law would soon wear an amendment covering these supplies, and that an additional appropriation could be obtained to such an amount that these supplies might be added from year to year, and that as a result our treasury would not be drained, nor would any one suffer on this account from over-taxation. Is there any object more worthy the kind consideration of our legislators than the public schools and the children of our State?

During the last session of the Legislature an amendment, as suggested, was somewhat favored by one branch, but no encouragement was received in the other. The very fact that it was looked upon with favor in the one body should spur us on to stronger and more united effort, with the hope that at the next session of our Legislature we shall obtain in full the amendment we pray for.

The minutes of the proceedings, as recorded by the secretary, are as follows:

STATE NORMAL SCHOOL BUILDING,

BALTIMORE, MD., *Thursday, December 1, 1898.*

The Association of School Commissioners and Examiners of the State met in annual convention, with Duncan Sinclair, of Allegany county, in the chair. The president ordered the roll of members to be called, which showed a small attendance.

The proceedings of the last meeting were read and ordered to be recorded as read. State Superintendent Prettyman read a synopsis of the reports from county examiners and Superintendent Wise, of Baltimore city, which showed a steady and satisfactory increase in all the departments of public education, with the largest amount expended for public schools in the history of the State. This, he said, was due in part to the new assessment, which had increased the taxable basis, and further, to a more liberal spirit toward public education. Report showed an increase in county school tax of $50,076.04, as compared with the report of last year. The counties had paid off nearly $150,000 of indebtedness during the year, which showed an excellent financial condition.

Mr. M. B. Stephens, Examiner of Caroline county, read a paper on "What more should be done to establish and maintain District School Libraries and Teachers' Libraries?" in which he urged the formation of Children's Reading Circles and Teachers' Reading Circles as necessary supports of the libraries. In this way, he claimed, that libraries could be obtained for all the schools.

Mr. Worthington, Examiner of Harford county, began the discussion of the paper by saying that he was heartily in favor of the school library, and was glad to make the boast that Harford was second to Caroline in the matter of forming district school libraries. He would not excuse the patrons from the contribution now required. He also touched upon the report of State Board of Education, explaining the decrease in average attendance of pupils.

Mr. Prettyman offered the following resolution, which was passed: "Ordered, That a committee of three, with John D. Worthington as chairman, be appointed to formulate a plan for determining best method of ascertaining the average attendance upon our public schools for the county school report, and report at this session." The chair appointed George Biddle and Alexander Chaplain to complete the committee.

E. B. Prettyman, Geo. C. Peason, of Washington county, H. G. Weimer, of Allegany, F. Eugene Wathen, of Anne Arundel, and others, indulged in a general discussion of Mr. Stephens' paper.

John E. Edwards, Examiner of Allegany county, read an interesting paper on "Should school supplies be paid for out of the Free Book Fund?" He claimed that reading charts

and some other school apparatus of like importance should be considered within the scope of free books, and paid for out of the free book fund. The paper was discussed by Examiner Burdette, of Montgomery, who favored the proposition, and E. B. Prettyman, who said that the bill as originally framed included school supplies. He thought "school supplies" too general to include for free use with books, but advocated a definite and itemized statement of supplies which should be named in a bill. Mr. Wathen offered the following resolution:

Resolved, That it is the sense of the Association of School Commissioners of the State of Maryland that school supplies, exclusive of furniture, should be furnished out of the Free Book Fund.

Resolved further, That a legislative committee be appointed and instructed to urge such change in the present law as will accomplish this purpose.

On motion, the resolution was referred to a committee to be appointed by the Chair, who shall report at the next annual session of this association.

The Chair appointed the following members of the committee: Dr. J. C. Nicholson, Eugene Wathen and John E. Edwards.

Dr. Nicholson gave an able talk on the question "Can the present law concerning District School Trustees be improved?" advocating the appointment of one trustee for each school, who shall act in conjunction with a member of the County School Board and the Examiners in the appointment of teachers. The plan he said met with the unanimous endorsement of the State Board of Education.

Josiah L. Kerr, Examiner of Dorchester county, discussed the paper and agreed that the present plan had its disadvantages and favored a change of the law as proposed by Dr. Nicholson. Mr. Biddle added his endorsement to the change.

Prof. Prettyman in scathing language denounced the results of the present plan and claimed that the system of three district trustees, with power to appoint and remove teachers, had outlived its usefulness and belonged to bygone days. In his opinion this is the weakest point in our school system, and maximum progress is impossible while the present system obtains. Dr. Forman could not endorse the plan at this time, but was open to conviction. He thought the election of trustees by popular vote had many points in its favor.

On motion, the association adjourned until tomorrow at 9:30 o'clock.

M. B. Stephens, *Secretary.*

Normal School Building.

Friday, *December 2, 1898.*

The Association met at 9.45 o'clock. On motion of Mr. Worthington, E. L. Boblitz and W. H. Shepherd were appointed a committee on nominations of officers for the next two years. Dr. S. E. Foreman, State Institute Conductor, read a valuable paper on "The best method of conducting Teacherss' Institutes."

The paper was discussed by Alexander Chaplain, Examiner of Talbot county; E. L. Boblitz, Examiner of Frederick county.

On motion of Mr. Worthington, the Institute Conductor, Dr. Foreman was requested to have his paper type-written or printed and sent to School Commissioners and School Examers, and that same be printed by permission of State Board of Education in their annual report.

U. G. Palmer, School Examiner of Garrett county, read an interesting paper on "Should there be a compulsory educational law in Maryland?" in which he said that the time had come for compulsory school attendance, and there should be a limited compulsory attendance law, say requiring sixteen weeks attendance upon school per annum.

The paper was discussed by School Examiner Farrar, Examiner of Carroll county, taking issue with same on ground of extra expense and trouble, and yet in theory he thought compulsory education was right.

Mr. Worthington reported for committee to submit the best plan for ascertaining average attendance of pupils, that the members of the committee had met and exchanged views. The question was of such a character that a proper change would so revolutionize average attendance as to embarrass some County School Boards at this time, and the chairman asked that the committee be allowed to report next year. Request granted.

George Biddle, Examiner of Cecil county, read a brief but pointed paper on the question, " The effects of the introduction of free books." He defended the law, and said it had come to stay. In Cecil county their free use had increased the enrollment of pupils 7 per cent., which alone was worth more than the expense.

The following resolutions were offered and passed:

1. WHEREAS the by-laws and decisions of our State Board of Education have the full force and effect of law throughout the State, and whereas it is highly important that all acts of the General Assembly bearing upon school matters should be brought before the executive school officers of the State as soon as practicable; therefore be it

Resolved by this body, That the State Board of Education be and hereby is requested as soon as possible after the adjournment of each General Assembly and at regular intervals afterwards to address by circular letter or otherwise each Board of County School Commissioners, setting forth therein the substance of all said Acts of Assembly and by-laws and decisions of said Board in order that they may be more accuately and faithfully administered.

2. WHEREAS very valuable papers have been read at the present session of this Association which we believe it important that those interested in our public school system should have the opportunity to read; and whereas we are informed that Governor Lowndes has already made a contract for printing the State School Report for 1898; therefore,

Resolved, That the State Board of Education be and they are hereby requested to incorporate said papers in said State report; provided, the Governor see proper to arrange with the printer for printing such additional material.

The question of ladies serving as school trustees was discussed by George Biddle, M. B. Stephens, R. F. Duer, H. A. McComas, J. L. Kerr and others.

The following resolution was passed:

Resolved, That the Executive Committee of this association be requested hereafter to give four weeks' notice to the persons placed on the program for the presentation of papers.

George C. Pearson offered the following resolution: "That a vaccination column be added to the teachers' report," but it was withdrawn after debate.

The committee on nomination of officers presented the following report:

To the President, Officers and Members, Association School Commissioners of the State of Maryland, your committee appointed to nominate officers of this Association for the ensuing two years, respectfully offer the following nominations:

For President, John D. Worthington, of Harford; first vice-president, E. R. Zimmerman, of Frederick; second vice-president, Louis L. Beatty, of Queen Anne's; Secretary, M. B. Stephens, of Caroline; Treasurer, Geo. C. Pearson, of Washington; executive committee, E. B. Prettyman, of State Normal School; H. A. McComas, of Washington county; H. G. Weimer, of Allegany county.

All of which is respectfully submitted,

WILL H. SHEPHERD,
E. L. BOBLITZ.

BALTIMORE, *December* 2, 1898.

The report was unanimously adopted.

On motion, the thanks of the Association were tended by unanimous rising vote to Hon. Duncan Sinclair for the able, impartial and courteous manner in which he had presided over the meetings of this Association for the last two years.

On motion, the customary fee of five dollars was ordered to be paid to the janitor of the building.

Association adjourned *sine die.*

M. B. STEPHENS, *Secretary.*

SCHOOL LEGISLATION.

SESSION OF 1898.

The General Assembly of Maryland, at its last session (1898,) passed or amended the following Public General Laws, relating in whole or in part, to public schools:

Chapter 21—Appropriates fifteen hundred and sixty-two dollars and one cent to reimburse Garrett county for an instalment of the State school tax, withheld in eighteen hundred and ninety-seven, and provides for a like instalment in 1898.

Chapter 106—Appropriates to the Western Maryland College, in addition to the sum now provided by law, the sum of six thousand five hundred dollars per annum, to furnish board and tuition to one female student from each Senatorial district of this State.

Chapter 221—Repeals and re-enacts with amendments, sections 11, 39, 71 and 76 of Article LXXVII of the Code,

providing that the decisions of the State Board of Education shall be final, restating the curriculum of the public schools of the State, providing for the appointment by the State Board of Education of a State Institute Conductor, whose salary and traveling expenses shall be paid out of the annual appropriation to the Maryland State Normal School, and increasing said annual appropriation to the sum of twenty thousand dollars.

Chapter 273—Provides for the establishment and maintenance by State aid, of Manual Training and Industrial Schools.

Chapter 291—Appropriates fourteen thousand dollars to the Maryland Agricultural College for the erection of a building for recitation rooms and laboratories, and for putting in sanitary plumbing in the dormitories.

Chapter 293—Appropriates to Washington College, five thousand dollars to aid in paying the cost of the erection of Normal Hall, the new building recently erected by said college; and also appropriates, in addition to the sum now annually paid to said College, the further sum of fourteen hundred dollars annually, to supply free tuition and free books to one male or female student from each and every county on the Western Shore of Maryland, either in the normal or collegiate department of said College.

Chapter 295—Provides for the payment by the State Treasurer, to the Board of County School Commissioners of Garrett county, the sum of four thousand dollars per annum, for two years, out of the proceeds of the State school tax before the apportionment thereof by the Comptroller.

Chapter 299—Appropriates to St. John's College the sum of fifteen thousand dollars for an additional building; and also appropriates, in addition to the sums annually paid by law, the sum of seven thousand dollars annually to be applied to the creation of fifty-two (52) additional scholarships, of the annual value of one hundred and thirty-five dollars, whereby needy and deserving students shall be partially aided and assisted in providing the cost of tuition, board or other expenses of education at St. John's College, leaving the sum of one hundred and forty dollars to be provided by such

students as their total expense for board and tuition, each college session.

Chapter 321—Appropriates to Charlotte Hall School, the annual sum of five thousand dollars for two consecutive years, in consideration whereof said school shall receive and give board and tuition, free of charge, to at least one student from each legislative district of the State.

Chapter 323—Appropriates for each of two fiscal years, ending in 1899 and 1900, to F. Knapp's English and German Institute for the training and education of indigent mutes the sum of one thousand two hundred dollars; to the Baltimore Manual Labor School the sum of two thousand dollars; to the Maryland Institute for the Promotion of Mechanic Arts, the sum of eight thousand dollars; to St. Mary's Industrial School the sum of fifteen thousand dollars; to St. Mary's Female Seminary the sum of five hundred dollars; to the Western Maryland College the sum of one thousand three hundred dollars; to the Maryland Agricultural College the sum of nine thousand dollars; to the Baltimore University School of Medicine the sum of one thousand dollars; to the Maryland Academy of Sciences the sum of five hundred dollars; to Washington College the sum of twenty-five hundred dollars.

Chapter 379—Appropriates to St. Mary's Female Seminary the sum of three thousand five hundred dollars, annually for two years, for the support and education of sixteen pupils, in addition to the ten now receiving the same, to be taken from each of the counties and each of the three legislative districts of Baltimore city.

Chapter 406—Makes appropriations for the support of the public schools of the State for the fiscal year ending on the 30th day of September, 1899, appropriating one hundred and fifty thousand dollars for colored schools, and the balance of the receipts from the State school tax, for white schools; provided that neither the city of Baltimore nor any county shall be entitled to any part of said public school tax or fund for white schools, in which city or county the colored schools shall not hereafter be kept open the same length of time as white schools; provided, however, this provision shall not be construed to require any county or the city of

Baltimore to keep open any colored school in which the average daily attendance is less than ten pupils for two consecutive terms; also appropriating for the erection of a building at Frostburg, Allegany county, to be known as State Normal School No. 2, the sum of twenty thousand dollars, and for the support of said school when established, five thousand dollars annually; to the Deaf and Dumb Asylum at Frederick, for the education of the deaf and dumb, twenty-five thousand dollars; to the Maryland School for the Blind, for the education of the deaf and dumb and blind colored children of the State, ten thousand dollars; to the Maryland Training School for Feeble Minded, three thousand dollars.

Chapter 409—Makes substantially the same appropriations for the fiscal year ending September 30, 1900.

Chapter 445—Repeals and re-enacts certain sections of Article 77 of the Code of Public General Laws, so far as relates to Garrett county; and provides for the election in Garrett county, at the general election in 1899, of three County School Commissioners and a County Examiner.

Chapter 520—Requires the State Board of Education and the Board of Public School Commissioners of Baltimore, to furnish the public schools of this State with a text-book upon civil government, in addition to the text-books now furnished them.

At the same session of the General Assembly, the following Acts relating to public education were also passed:

Chapter 12—Amends the charter of the Western Maryland College.

Chapter 22—Provides for building two school houses for colored children in St. Mary's county.

Chapter 28—Provides for the erection and equipment of a County High School in Laurel, Prince George's county.

Chapter 66—Provides for the building of one school house for white children, and also three school houses for colored children in Prince George's county.

Chapter 67—Authorizes the County Commissioners of Allegany county, to issue bonds to an amount not exceeding

fifty thousand dollars for buying sites and building school houses in said county.

Chapter 71—Provides for the election by the Board of County School Commissioners of Anne Arundel county, of a County School Examiner, and prescribes his duties.

Chapter 90—Incorporates "The Buckingham Industrial School," of Frederick county, Maryland.

Chapter 143—Provides for the erection of a school house for white children in Anne Arundel county.

Chapter 165—Provides for the building of a school house for colored children in Charles county.

Chapter 176—Provides for the erection of a school house in Anne Arundel county.

Chapter 180—Provides for the payment of teachers' salaries in Baltimore county twice during each term.

Chapter 194—Appropriates for the relief of the Johns Hopkins University fifty thousand dollars for the year 1898, and also fifty thousand dollars for the year 1899.

Chapter 196—Provides for the erection of a school house for colored children in Calvert county.

Chapter 269—Provides for determining the question of whether or not the County Commissioners of Garrett county shall issue bonds to an amount not exceeding the sum of twenty thousand dollars for the purpose of erecting, repairing and furnishing school houses in said county, by a vote of the people of said county, at the November election in the year 1898.

Chapter 276—Provides for the building and furnishing of a public school building in the city of Annapolis, and the management of a free district school therein for colored children.

Chapter 278—Provides for the incorporation of the "Trustees of Fairmount Academy," in Somerset county.

Chapter 334—Provides for the erection of a school house for white children in the eighth election district of Anne Arundel county.

Chapter 336—Prohibits the issuing of any license for the sale of spirituous or fermented liquors, within three quarters of a mile of public school No. 6, located at Halethorpe, in Baltimore county.

Chapter 372—Is supplementary to an Act "to provide for the building and furnishing a public school building in the city of Annapolis."

Chapter 401—Appropriates a sum of money to pay the Treasurer of the State Board of Education the amount of sundry bills paid by him for repairs to the State Normal School building.

Chapter 447—Provides for the repairing, improving and adding to the present school house and lot of ground for colored children in Rockville, Maryland.

Chapter 450—Provides for refunding a sum of money to George B. Yantis for an unused hotel liquor license.

Chapter 451—Requires the County School Commissioners of Montgomery county to pay the salaries of public school teachers in said county monthly.

Chapter 464—Authorizes the Board of County School Commissioners of Baltimore county, to establish Kindergarten schools in said county.

Chapter 473—Authorizes the refunding of a sum of money to Jonathan Reynolds, Treasurer of the Rising Sun Normal School Association of Cecil county, erroneously paid by him into the State treasury.

Chapter 527—Repeals and re-enacts with amendments an Act to appropriate the fines and forfeitures imposed by the Circuit Court for Baltimore county and by justices of the peace thereof, to the Treasurer of the Board of County School Commissioners of Baltimore county, for the use of the public schools of said county.

CONCLUSION.

The friends of public education will find the questions that are now most prominent in the discussions of the school officers of the State, very ably and interestingly treated in the papers read before the Association of School Commissioners of Maryland at its last session, in December, 1898, and which are published in this report, at the request of that association.

The importance and value of the adoption of the free text-book legislation has been finally settled by actual experience. The only phase of this subject that is now under discussion is the proposal to extend the benefits by embracing "School Supplies" as an amendment within the scope of the law. The General Assembly in 1896, no doubt wisely, struck out of the free-text book bill as offered, the provision for free "School Supplies." But now that the public schools have been gradually and fully supplied with free text-books, it is believed that the time has come for the thoughtful consideration of the extension suggested. There seems to be a consensus of opinion that the phrase "School Supplies" is too broad and vague. The experience of some of our sister States has been that in the execution of laws containing provisions for free school supplies, much money has been wasted in the purchase of worthless articles. It has therefore been suggested that in any amendment of the law in question, the language employed should be explicit and carefully guarded, as to *what* "supplies" may be purchased under the provisions of the law.

The provision for the appointment of a State Institute Conductor, made by the General Assembly of 1898, has been carried out, and the law requiring the holding of a Teachers' Institute in each county of the State for five days in each year, having thus become possible, this officer is engaged under a schedule embracing every county, in holding such Institutes.

The information that has reached this office so far concerning these Institutes is encouraging, and the promise of improvement and inspiration to the teachers of the State, and of increased interest on the part of the public in our school system therefrom, is all that could be expected. As the years go by, no doubt these effects will be more and more obvious.

Under the scrutiny to which our public school system is continually and properly subjected from year to year, by school officers and others interested in public education, it is becoming habitual to endeavor to ascertain, especially from experience in this and other States, how, if possible, our

system may be improved. Although a just pride is felt in what has been done in the past, it is felt and believed that in some respects we might do better. No subject has recently received more attention and thought, than that of the appointment of teachers. Eligibility to such appointment is carefully guarded in our laws. The testing of the scholastic attainments necessary is properly provided for. But still the power of actual appointment from among those thus declared eligible, is the most important and vital function exercised by any school officers. However good may be our system, after all, the actual, practical good results therefrom, depend upon the character, habits and capabilities of the individual teachers appointed to the schools, more than upon all other agencies combined. No one will deny that the sole aim of those who make these all-important appointments should be to procure the teachers who are in all respects best equipped for their important work. Neither fear, favor, partiality nor any personal or selfish motive, should have weight in the performance of such high duty. Toward this ideal all lovers of public education should strive together. The State Board of Education, after careful deliberation and much earnest consideration, has unanimously suggested a change which it is believed would be an improvement, viz: To have one District School Trustee, who should perform all the duties now required of the board of three trustees, except that in the appointment of teachers, he should be aided by one of the County School Commissioners and by the County Examiner. Whilst the State Board fully realizes that there are very many District Trustees throughout the State who are conscientiously endeavoring to perform the duties which the law requires, they are led to believe from their information, that one trustee in each School District could perform these duties as well as three, fully representing the local needs, and that a committee to appoint teachers, composed as they have suggested, would strengthen the appointing power, and make less likely appointments from motives less high than the ideal suggested.

It has also been found by actual experience in some counties, that the appointment of ladies as District School Trustees has had beneficial effect.

Another matter of vital interest to the school system is increase of funds. A favorite and always appropriate theme for discussion at Teachers' Institutes and other educational assemblies is the inadequate salaries paid to teachers. The majority of our teachers have been carefully prepared for their duties at expense of time and money, have continued to

be students, are earnest and enthusiastic in their work, and yet they receive salaries so poor that other occupations lure them, especially the gentlemen, from the profession of teaching, because thus they may enter upon careers in which they can reasonably expect such remuneration as they feel they deserve. There is before us, in the near future, an opportunity for the increase of school funds that calls for the co-operation of all who are earnestly in favor of advance in educational affairs. The report of the State Comptroller will demonstrate that our State finances have been so ably administered that our good State is actually free from public debt. The School Officers of the State, at their annual meetings, foreseeing this state of affairs, so creditable to the Treasury Officers, have put themselves on record, in a resolution unanimously adopted, that in proportion as our State debt is diminished, the State school tax should, in like ratio, be increased. It is known to all intelligent citizens who study the Comptrollers' reports, as every citizen should, that our whole State tax is seventeen and three-fourth cents on the $100 worth of property, distributed as follows: Ten and one-half cents for the State school tax, two cents for free books and five and one-fourth cents to pay the State debt. It is evident that at the next session of the General Assembly, in January, 1900, the question must be settled, what shall be done with the five and one-fourth cents heretofore used to pay the State debt, but happily no longer needed for that purpose? There can be but two propositions: *First.* To abolish the five and one-fourth cents tax; and, *secondly*, to increase the State school tax by that amount. This is a live question, and now is the time for all interested in public schools to aid in concentrating public opinion in favor of the increase of the State school tax. It is a grand opportunity that should not be neglected nor postponed.

The next Congress is opportune for the presentation of the claim of the State of Maryland, for its just and equitable share of the proceeds of the public lands of the United States, for the support of our State public schools, and it will be presented by the committee of the State Board of Education, Governor Lowndes, chairman, and as we are advised, will be urged by our Senators and Representatives.

There are just before us these great opportunities, and if the real friends of our State system of public schools will work together with zeal, great results may fairly and reasonably be expected.

E. B. PRETTYMAN,
Secretary State Board of Education.

REPORTS

—OF THE—

School Commissioners

—OF—

THE COUNTIES.

ALLEGANY COUNTY.

Cumberland, Md., October 4, 1898.

PROF. E. B. PRETTYMAN,
Secretary State Board of Education.

Dear Sir: I herewith submit the Annual Report of the Public Schools of Allegany county, Maryland, for the year ending July 31, 1898.

Very truly, yours,

H. G. WEIMER, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1898.

	1898.	1897.
Number of school houses owned by the county, 96; rented, 4; total	100	99
Number of rooms occupied when attendance is largest	188	184
Number of male teachers (principals), white, 27; colored, 2; total	29	32
Number of female teachers (principals), white, 66; colored, 2; total	68	68
Number of female teachers (assistants), white, 94; colored, 2; total	96	92
Total, white, 187; colored, 6	193	192
Number of fenced lots	48	45
Number of schools having out-buildings	100	99
Number of schools having sufficient blackboards	100	99
Number of schools having good furniture	98	97
Number of terms schools were open—white, 3½; colored, 3½.		
Number of different pupils for the year—white, 9,775; colored, 260; total	10,035	9,182
Number of pupils in average attendance—white, 5,918; colored, 141; total	6,059	5,640
Number of official school visits paid by examiner	160	164

SUMMARY OF SCHOOL STATISTICS—Continued.

Number of Pupils.

		Fall Term.		Winter Term.		Spring Term		Summer Term.	
On roll	white,	8,642	8,884	8,560	8,787	8,317	8,536	6,396	6,485
	colored,	242		227		219		89	
Average attendance	white,	6,527	6,697	6,254	6,420	6,065	6,222	4,824	4,894
	colored,	170		166		157		70	

	1898.	1897.
Number of pupils in 1st grade Jan. 1st	3,003	2,910
" " 2d " "	1,624	1,773
" " 3d " "	1,801	1,533
" " 4th " "	1,694	1,461
" " 5th " "	1,006	923
" " 6th " "	680	599
" " above 6th grade Jan. 1st.....	227	197

Number of pupils in book-keeping, 135; algebra, 466; physiology, 1,715; geometry, 320; philosophy, 41; drawing, 450; latin, 155.

ALLEGANY COUNTY SCHOOL STATISTICS.

ATTENDANCE FOR THE YEAR ENDING JULY 31st, 1898.

ANNE ARUNDEL COUNTY.

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1898.

	1898.	1897.
Number of school houses owned by the county, 90; rented, 25; total	115	115
Number of male teachers (principals), white, 13; colored, 14; total	27	25
Number of female teachers (principals), white, 63; colored, 23; total	86	86
Number of male teachers (assistants), colored, 1; total	1	1
Number of female teachers (assistants), white, 22; colored, 6; total	28	27
Total white, 98; colored, 44; total	142	139
Number of terms school were open—white, 3 3-5; colored, 3 3-5.		
Number of different pupils for the year—white, 3,886; colored, 2,901; total	6,787	6,586
Number of pupils in average attendance—white, 2,298; colored, 1,415; total	3,713	3,487
Number of pupils over 16 years of age—white, 104; colored, 86; total	190	206

NUMBER OF PUPILS.

		Fall Term.		Winter Term.		Spring Term.		Summer Term.	
On roll	white,	3,157	5,250	3,419	6,025	3,460	5,970	3,040	4,830
	colored,	2,093		2,606		2,510		1,790	
Average attendance	white,	2,151	3,361	2,697	4,254	2,340	4,011	1,983	3,206
	colored,	1,210		1,557		1,671		1,223	

	1898.	1897.
Number of pupils in 1st grade Jan. 1st	1,568	1,542
" " 2d " "	1,115	1,097
" " 3d " "	986	1,029
" " 4th " "	838	923
" " 5th " "	620	651
" " 6th " "	370	332
" " above 6th grade Jan. 1st	340	94

Number of pupils in book-keeping, 84; algebra, 265; physiology, 1,968; geometry, 33; philosophy, 104; drawing, 1,500; Latin, 42.

Total	$ 12,157 72

CALVERT COUNTY.

PROF. E. B. PRETTYMAN,
Secretary State Board of Education.

My Dear Sir: I herewith send the Annual Report, which has been hurriedly made out. I trust you will find it right. I came into the Board on August 2d, 1898, therefore I cannot make any statement relative to the Public Schools.

Very truly yours,

J. FRANK PARRAN, *Examiner.*

SUMMARY OF SCHOOL STATISTICS.

CECIL COUNTY.

Elkton, Md., August 27, 1898.

PROF. E. B. PRETTYMAN,

My Dear Sir: Enclosed find statistical report for the year ending July 31, 1898. The report of last year showed an attendance of 500 above any previous year; this surpasses last year by 50.

Yours truly,

GEORGE BIDDLE, *Secretary.*

GEORGE A. BLAKE, *President*, Term expires Aug., 1904, Elkton.
CORNELIUS S. ABRAHAMS, Term expires Aug., 1904, Woodlawn.
GEORGE O. GAREY, Term expires Aug., 1900, North East.
School Commissioners.

FREDERICK COUNTY.

OFFICE OF THE
BOARD OF SCHOOL COMMISSIONERS FOR FREDERICK CO..

Frederick, Md., October 19, 1898.

PROF. E. B. PRETTYMAN,
Secretary State Board of Education,
Baltimore, Md.

Dear Sir: The Annual Report of the Public Schools of Frederick county, for the year closing July 31st, 1898, is herewith respectfully submitted. The summary, will, it is believed, give all data necessary for reference and comparison.

A Teachers' Institute was conducted from December 20th to 23d, 1897. It was attended by all of the teachers who were able to be present. The attendance of visitors was good. Able instructors from the State Normal School and elsewhere delivered valuable and instructive lectures which were listened to with great interest by the teachers, who received fresh inspiration, and returned with greater diligence to the discharge of their responsible duties.

The attendance of patrons and friends of our system of public schools was large, and great interest was manifested by them in the proceedings.

The following resolution was unanimously adopted:

Resolved, "That we, the teachers of Frederick county, do hereby urge and earnestly request the gentlemen from this county, who are members-elect of the General Assembly of Maryland, which convenes in January, 1898, to use their utmost endeavors to have a law enacted, giving us free supplies with free books."

An earnest, but fruitless effort was made to have a bill passed in accordance with the resolution, at the meeting of the General Assembly.

We desire to again express the opinion, that supplies, especially copy books, should be free, and we believe, that with proper care of text books, the appropriation for free school books will be sufficient to pay for both.

Respectfully yours,

E. R. ZIMMERMAN, *President.*
EPHRAIM L. BOBLITZ, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1898.

	1898.	1897.
Number of school houses owned by the county, 163; rented, 14; total	177	174

PRINCE GEORGE'S COUNTY.

Upper Marlboro, August 26, 1898.

PROF. E. B. PRETTYMAN,

Secretary State Board of Education,

Baltimore, Md.

Dear Sir:—I herewith submit the annual report of the public schools of Prince George's county for the year ending July 31st, 1898.

I have little to add to the information given in the tabulated report.

The financial condition of the schools is good. The County Commissioners have been most liberal to the public schools. The levy for this year for current expenses of the white schools is twenty thousand dollars, the cash balance to the credit of these schools is over three thousand dollars. So the white school fund is larger this year than ever before in the history of the county. The colored fund has over eleven hundred dollars to its credit. There are simply no debts against either the white or colored fund.

The school houses of the county are in tolerable repair, and most of them well supplied with school furniture. There are a sufficient number of houses to accommodate the white children of the county. A few of these buildings are improperly located and should be moved to more convenient sites. While the county has levied money to build several houses for colored children, the colored people yet need more school buildings and better school facilities for carrying on the work.

The children of the county, both white and colored, are amply supplied with text books in all the grades, while there is a large surplus of money on hand for both funds. The free book fund for colored children has been kept distinct from that for white children, and the balances, as shown by the financial statement, carefully made. No money given for the purchase of text books has been expended for any other purpose.

On the 15th of July the county school commissioners sold bonds for the erection and equipment of a county high school, to be located in the town of Laurel. The face value of the bonds was eight thousand dollars. Proceeds of sale, eight thousand eight hundred and thirteen dollars, to which sum the people of Laurel add two thousand dollars.

All things considered, the prospects of the schools are brighter than ever before.

Respectfully submitted,

THOS. S. STONE, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1898.

	1898.	1897.
Number of school houses owned by the county, 85; rented, 1; total	86	85
Frame, 85; brick, 1	86	85
Number of rooms occupied when attendance is largest	104	104
Number of male teachers (principals), white, 11; colored, 6; total	17	16
Number of female teachers (principals), white, 51; colored, 21; total	72	69
Number of male teachers (assistants), colored, 2; total	2	1

ST. MARY'S COUNTY.

Leonardtown, Md., October 3, 1898.

PROF. E. B. PRETTYMAN,

Secretary State Board of Education,

Dear Sir: I have the honor to herewith submit the annual report for the Public Schools of St. Mary's County, for the year ended July 31st, 1898.

There is nothing of especial interest to add to the statistical part of the report.

The meetings of our County Teachers' Associations held this year, have been well attended, and, we think, productive of good. It is our purpose to hold a Teachers' Institute, some time in the ensuing year.

Our colored school facilities are inadequate. During the Winter and Spring terms, many of the colored schools are overcrowded, and the teacher has often more work than can properly be done. We are looking forward to the increase in the State appropriation for colored schools to afford us the funds necessary to relieve, in the near future, this condition.

The balance on hand $680.42, is credited as follows: $125.46 to the white fund, and $554.96 to the colored fund. In this connection, it is gratifying to state that we are now out of debt. We do not owe a dollar

Very respectfully,

GEO. W. JOY, *Secretary*.

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1898.

	1898.	1897.
Number of school houses owned by the county, 68; rented, 4; total	72	69

APPENDIX.

EXTRACTS FROM THE BY-LAWS

—OF THE—

STATE BOARD OF EDUCATION.

The following classification and schedule of studies shall be observed in all Primary and Grammar Schools, and in those classes of High Schools to which they are applicable:

First Grade.

1. Reading and spelling from Chart or Blackboard; reading or spelling Primer or First Reader. 2. Writing capitals and small letters from copies on blackboard. 3. Counting objects. 4. Writing figures as far as 100. 5. Adding, subtracting, multiplying and dividing by 2, 3, 4, orally, and by written work. 6. *Drawing.* 7. *Object lessons.* 8. *Singing.*

Second.

1. Reading and spelling to the end of Second Reader. 2. Writing words and sentences from blackboard and from Second Reader. 3. Writing and reading figures as far as 1,000. 4. Adding, subtracting, multiplying and dividing by 5, 6, 7, 8, 9. Mental Arithmetic. 5. *Drawing.* 6. *Object lessons.* 7. *Singing.*

Third.

1. Reading and spelling to the end of Third Reader. 2. Copying on slates the lessons of the Reader, and exercises in Dictation. 3. Spelling, one-half of Primary Speiling-Book. 4. Writing and reading figures as far as millions. 5. Addition, subtraction, multiplication and long and short division. Mental Arithmetic. 6. Writing in Copy-Book, Nos. 1 and 2. 7. Language lessons begun. 8. Oral lessons in Geography, including the Maps of Maryland and the United States. 9. *Drawing.* 10. *Object lessons.* 11. *Singing*

Fourth.

1. Reading and spelling to the end of Fourth Reader. 2. Primary Spelling-Book completed. 3. Copying of lessons in Fourth Reader. Reading from slates the lessons copied; Dictation and reproduction exercises. 4. Elementary Arithmetic, through Fractions. Mental Arithmetic. 5. Writing Copy-Book, Nos. 3 and 4. 6. Primary Geography, with Oral lessons and Map Drawing. 7. Language lessons continued. 8. *Drawing.* 9. *Object lessons.* 10. *Singing.*

Fifth.

1. Reading and spelling, Fifth Reader, alternate with History of Maryland and of the United States. 2. Writing lessons in Fifth Reader from Dictation. 3. Spelling—advanced Spelling-Book. 4. Arithmetic, 2d book

☞ Subjects in *italics* are recommended, but are not obligatory.

completed. Mental Arithmetic. 5. Writing—Copy-Book, No 5. 6. Language lessons continued, with Composition and Letter Writing. 7. Grammar—Parsing and Analysis of easy sentences. 8. Advanced Geography. 9. Elementary Physiology. 10. *Drawing.* 11. *Singing.* 12. *Needle-work* and *Domestic economy* (for girls.) 13. *Elements of Agriculture*, when ordered.

Sixth.

1. Reading and Spelling to end of Fifth Reader, alternate with History of Maryland and of the United States. 2. Spelling—Advanced Spelling-Book conpleted. 3. Practical Arithmetic completed. Mental Arithmetic. 4. Writing—Copy-Book, No. 6. 5. Advanced Grammar. 6. Geography completed. 7. Lessons in Composition and Letter Writing. 8. Physiology completed. 9. *Drawing.* 10. *Singing.* 11. *Needle-work* and *Domestic economy* (for girls.) 12. *Elements of Agriculture.*

Time Table.

Each grade may have four daily recitations, as follows:

1st.	1 lesson of 15 minutes and three of 10 minutes each	—45	minutes.
2d.	" " " " "	—45	"
3d.	" " " " "	—45	"
4th.	2 lessons of 15 minutes each and 2 of 10 each	—50	"
5th.	" " " " "	—50	"
6th	1 lesson of 20 minutes and 3 of 15 minutes each	—65	"

The available portion of the remaining hour, and the time that may be gained by the absence of all pupils in any grade, may be spent in general exercises, or in studies above sixth grade, when there are pupils sufficiently advanced.

High Schools.

8. The High School course shall begin with the completion of the sixth grade, and may include all the studies required for admission into the Freshman class at college.

9. No school shall be classed as a High School unless it contains at least two grades higher than the sixth.

10. The following schedule of studies is recommended for adoption in the High Schools and the higher classes of graded schools.

Seventh.

1. Arithmetic reviewed. 2. Algebra (Wentworth's or Robinson's) through Equations of the first degree. 3. Geometry (two books of Wentworth or an equivalent)—Geometrical Drawing. 4. Physical Geography. 5. English Grammar—Morris' "Elementary Lessons"—Parsing and Analysis of "Paradise Lost," Book I. 6. Practical exercises in Composition. 7. English History—Green's "Short History." 8. Latin Grammar and Reader. 9. Book-keeping. 10. Physiology—(Martin's Human Body.)

Eighth.

1. Algebra through Equations of the second degree and Progressions. 2. Geometry, Plane and Solid, completed. 3. Natural Philosophy. 4. Rhetoric. 5. Modern History. 6. Latin—Cæsar "De Bello Galico," three books. 7. Physiology completed.

Ninth.

1. Plane Trigonometry and Surveying. 2. Chemistry. 3. Botany. 4. Ancient History. 5. English Literature (Sharv's.) 6. English Language (Lounsbury.) 7. Elocution. 8. Latin—Virgil's Æneid, four books; Sallust—"The Conspiracy of Catiline."
